

# Electrical Exam Preparation

## We can help you pass your exam...

For over 39 years we have been successfully preparing electricians for state and county electrical exams by giving them the knowledge and confidence they need to pass their exams the first time.

## How can our home study programs help you?

- You can study when you want, where you want, and at your own pace.
- You'll get the most comprehensive training system available for Electrical Exam Preparation.
- You'll understand the material faster with the hundreds of full-color, detailed graphics showcased in our books that set the standard for learning.
- You'll gain the confidence you need for your exam by working through the practice questions for each area of your test.
- You will learn from the best in the business. Mike Holt and the panel of experts on his DVDs provide an in-depth review of each topic, and their analysis helps you understand how to apply the information in the real-world.

You can rely on us to be here for you every step of the way. We have been doing this for a very long time, and we know what it takes to pass exams. Whether it's getting you a custom study program, or helping you find information about your particular exam, we are here to help you.

## Florida State Exam Preparation

Our Florida State Exam Preparation program has set the standard for training for over 35 years. This combination program incorporates the best of our home study programs along with our intensive live 6-day course that will prepare you for both the Technical and Business portions of your exam. This program is available for the following Florida state licenses:

- Unlimited
- Alarm
- Limited Energy
- Lighting
- Residential
- Sign
- Utility

**Our instructor John Mills has been leading this course for over 16 years, and here is a sample of what his students say about this program:**

*"The Florida State Exam class was great. I would rate the course a 10. The most important thing I learned was precisely how to prepare for the test including what to expect the testing environment to be like, what the test questions will be like, and how they may ask for answers in different ways. All around John was not just a great instructor but he was also a great guy to spend that much time with. He did a good job of breaking up the monotony of studying with good humor and other insights relevant to the trade."*

– Jonathan McAuley  
Electrical Contractor

*"This course is a 10! John did an excellent job explaining the material and really knows his stuff. The most important thing that I learned was how to look-up and understand the Florida Contractors Manual. He broke it down, so I would know where to look. He really is a great asset for Mike Holt Enterprises! Thanks."*

*“Your programs work!! I really appreciate the way explanations are clear and complete. I also like the illustrations. Your methods are well thought out and presented clearly - you don’t teach students to “memorize only”. This is the only study material I’ve found that makes it possible to learn outside a classroom/instructor environment.”*

– Frank Heald
