About Mike Holt and Mike Holt Enterprises...

About Mike Holt. Mike Holt worked his way up through the electrical trade from apprentice electrician to master electrician and electrical inspector. Mike did not complete high school due to circumstances beyond his control. Realizing that success depends on one's education, he immediately attained his GED, and ten years later he attended the University of Miami's Graduate School for a Master's degree in Business Administration (MBA). Today, Mike continues to stay current in all aspects of his education. Because of his educational experiences, he understands the needs of his students, and strongly encourages and motivates them to continue their own education.

Educator. Mike is nationally recognized as one of America's most knowledgeable electrical trainers. He has touched the lives of thousands of electricians, inspectors, contractors and engineers. His dynamic and animated teaching style is relaxed, direct and fun. Perhaps Mike's best quality is his ability to motivate his students to become successful.

Code Expert. Mike has devoted his career to studying and understanding the National Electrical Code®, the foundation of the electrical industry. Years of researching the NEC and understanding its background has not only made Mike an expert, but has earned him the respect of his peers. His insight has been helpful in litigation problems where the exact meaning of the Code is essential.

Trainer and Industry Expert. Companies across the United States have utilized Mike's services for in-house training and expert advice. His unsurpassed speaking ability has benefited companies such as AT&T, IBM, and Boeing; associations such as NECA, IAEI, IBEW, and ICBO; and governmental agencies such as the U.S. Navy, Grand Coulee Dam, the Department of Energy, and the Department of Defense.

Author. Mike Holt is a well-respected author and publisher of books and DVD training programs. He has mastered the art of explaining the complicated in a simple but direct style. His ability to simplify technical concepts makes him one of America's most sought after speakers and writers in the electrical trade. His extensive use of illustrations in all of his training programs makes learning fun and is the ideal answer to every study need.

The Man. Mike resides in Central Florida, is the father of seven children, and has many outside interests and activities beside electricity. Mike is a six time National Barefoot Water Ski Champion ... 1988, 1999, 2005, 2006, 2007 and 2008. Mike is currently training to ski the 2009 World Championships in New Zealand. "I think you have the best book on the market to learn and teach the NEC code by. I agree with the decision to print the document in two volumes to fit a first semester course better. Extensive use (and available to the instructor) of graphics helps to obtain and maintain class participation. The various tests also help the student and the instructor in confirming and documenting that learning has occurred."

"Great job on the Grounding versus Bonding series. I couldn't believe how in-depth it was, yet clear for all to be able to understand. I watched it for the first time, and the next week started to watch it again. I have since finished it and started on it for the third time. Every time I watch it I see things I have been wondering about for years and I usually say, "Why didn't anyone explain it like that before?" Great job! Keep up the good work."
