# We do everything we can to take care of you...

### **Free PowerPoints**

Save time, and bring the class to life with the full-color illustrations that match your book.

\*Available for Free when you purchase a Class Set

"Thanks to having the slides in PowerPoint I am able to augment your information with additional information that I like to add to make the class "my class" but provide the students with exceptional study material."

Training Technology—Larren Elliott

# **Free Online Testing Service**

Give your students the flexibility to take their tests online and free up your class time for in-depth teaching.

"I think you have an excellent product here that saves me time writing and grading tests. It allows more time in class for discussions. Most of my students are liking the on-line test, some however are not very computer friendly and are intimidated by the test. The State of Idaho Journeyman's test is on the computer, so this will help prepare them."

River City Exam Prep—Bob Baird

# **Free Exam View Questions**

Save hours of work creating and grading tests. When your school orders a \*Class Set you qualify for the Exam View Questions for free!

Price: \$59.00

"I love, love your Exam Prep book! It teaches everything in a very simple and easy to understand way. I love the simple drawings - I will not buy any other books anymore! Please don't change a thing about the way you teach or your style!!!! Absolutely nothing!!!! Your team really gets it, they really do. Your books have been a real blessing to me. "

Marlon Valenzuela

<sup>\*</sup>Available for 2008 and 2011 NEC Editions

### **Electrical Estimating**

Product Code: EST2B ISBN 2: 978-1-932685-50-3

Pages: 256 Illustrations: 9

Practice Questions: 328

Price: \$82.00

"I've been in the electrical trade for 37 years, both as an electrician and contractor. Estimating (bidding) has always been hit and miss with me. My current employer gave me your Estimating book. It gave me a clarity of the bidding process. I now use your systematic approach and have much more confidence in my bidding."

Ed Roberts

#### **Basic Motor Controls**

Product Code: MCMB ISBN: 978-1-932685-32-9

Pages: 272 Illustrations: 449 Practice Questions: 304

Price: \$40.00

"I am currently using this text in a class I'm teaching. I find it to be clear and simple to understand. The pictures and diagrams are great! This makes 4 or 5 of Mike's books that I've used over the years and I refer to them time and time again even to explain something at work. Thanks for another quality product "

# What Instructors are Saying

# **About Our Training Materials**

Your products visualize the Code in a way not seen before in the industry.

I can cover more material because the student understands the material faster. I am extremely pleased with the entire organization."

# M.S. Electrical Training Marty Schumacher

"I have been purchasing your training material since 1999 for our community college. The most common discussion after a semester is how well the example pictures relate to Mike's comments in order to clarify the intent of a Code article. We all retain information differently & using all of the methods in your books, work well together. Customer service could not be better. I purchase material every day & have never had better service. Keep up the good work."

### **Central Maine Community College**

### **Dominique Gagne**

"You get it! Electrical work isn't rocket science and the way you present the harder elements of our work makes it clearer so that you can approach it with more confidence. Thanks Mike and your staff and above all your illustrator!" **CHI Institute** 

### Hary Cook

"Mike Holt's books are the best in the industry; the graphics are awesome and the explanations make difficult Code sections easier to understand. All of the staff that I have dealt with have been great. I am an instructor and I teach students with little knowledge of the Code. The way your books are written and illustrated people new to the NEC can quickly grasp first the structure of the book and later the intent of the individual articles and sections. Thanks for your commitment and passion to be the best, it really shows in all your publications."

### McHenry County College

### Kevin Ryan

"Through the years you have been a great resource for us. I appreciate the willingness to do whatever it takes to get us what we need and when we need it for our training classes. It has truly been a pleasure to work with you."

### **ABC Southern California Chapter**

### Theresa Lovejoy

"Your product stands out to be the best that I have seen and used. Your PowerPoints are an asset in the classroom and make explaining things to my students easier especially when they are new to the field and just learning what all the items in the Code are talking about. Thank you and keep up the great work."

### Milwaukee Area Technical College

#### Heidi Peterson

"As Coordinator of Technical Training in a community college/training center and an instructor, I am happy that your company has the resources designed to address beginning level through journeyman level individuals. I am looking forward to continued service and partnership with your organization."

# Mid-Michigan Community College Ed Van Avery

"Customer Service and Outstanding Products - the best around!!! You will always have our business. We instructors of Northeast State's Electrical Technology program could not be more pleased. The students love the Understanding NEC textbook and your website as well as the Changes to the NEC2011 book and your Motor Controls book."
