Article 90—Introduction	1	Part II. 600V, Nominal or Less	43
90.1 Purpose of the NEC	1	110.26 Spaces About Electrical Equipment	43
90.2 Scope of the NEC	2	110.27 Guarding	48
90.3 Code Arrangement	4	Article 110 Questions	49
90.4 Enforcement	5		
90.5 Mandatory Requirements and Explanatory Material	6		
90.6 Formal Interpretations	6		
90.7 Examination of Equipment for Product Safety	6		
90.9 Units of Measurement	7		
Article 90 Questions	8		
		Chapter 2—Wiring and Protection	51
Chapter 1—General	9		
		Article 200 Use and Identification of Grounded Neutral Conductor	53
Article 100 Definitions	11	200.1 Scope	54
		200.6 Identification of the Grounded Neutral Conductor	54
Article 110 Requirements for Electrical Installations	31	200.7 Use of White or Gray Color	56
		200.9 Terminal Identification	57
Part I. General Requirements	31	200.10 Identification of Terminals	57
110.1 Scope	31	200.11 Polarity	57
110.2 Approval of Equipment	31	Article 200 Questions	58
110.3 Examination, Identification, Installation, and Use of Equipment	31		
110.4 Voltages	32	Article 210 Branch Circuits	59
110.5 Copper Conductors	32		
110.6 Conductor Sizes	32	Part I. General Provisions	59
110.7 Conductor Insulation	33	210.1 Scope	59
110.8 Suitable Wiring Methods	33	210.2 Other Articles	60
110.9 Interrupting Protection Rating	33	210.3 Branch-Circuit Rating	60
110.10 Short-Circuit Current Rating	34	210.4 Multiwire Branch Circuits	60
110.11 Deteriorating Agents	35	210.5 Identification for Branch Circuits	62
110.12 Mechanical Execution of Work	36	210.6 Branch-Circuit Voltage Limitation	63
110.13 Mounting and Cooling of Equipment	37	210.7 Branch-Circuit Receptacle Requirements	63
110.14 Conductor Termination	37	210.8 GFCI-Protected Receptacles	64
110.15 High-Leg Conductor Identification	41	210.11 Branch-Circuits Required	68
110.16 Flash Protection Warning	42	210.12 Arc-Fault Circuit-Interrupter (AFCI) Protection	71
110.21 Manufacturer's Markings	42	210.18 Guest Rooms and Guest Suites	71
110.22 Identification of Disconnecting Means	43		
		Part II. Branch-Circuit Ratings	71
		210.19 Conductor Sizing	71
		210.20 Overcurrent Protection	73
		210.21 Outlet Device Rating	74
		210.23 Permissible Loads	74
		210.25 Common Area Branch Circuits	75

Part III. Required Outlets	75	220.84 Multifamily—Optional Load Calculation	108
210.50 General	75	220.85 Optional Calculation—Two Dwelling Units	108
210.52 Dwelling Unit Receptacle Outlet Requirements	75	Article 220 Questions	109
210.60 Receptacles in Guest Rooms or Guest Suites for Hotels and Motels	81	Article 225 Outside Wiring	111
210.63 Heating, Air-Conditioning, and Refrigeration Equipment (HACR)	82	Part I General Requirements	111
210.70 Lighting Outlet Requirements	82	225.1 Scope	111
Article 210 Questions	85	225.2 Other Articles	111
Article 215 Feeders	87	225.6 Minimum Size Conductors	112
215.1 Scope	87	225.7 Luminaires Installed Outdoors	112
215.2 Minimum Rating	87	225.15 Supports Over Buildings	112
215.3 Overcurrent Protection	88	225.16 Attachment	112
215.8 High-Leg Conductor Identification	89	225.17 Masts as Support	113
215.10 Ground-Fault Protection of Equipment	89	225.18 Clearances	113
215.12 Identification for Feeders	89	225.19 Clearances from Buildings	113
Article 215 Questions	91	225.22 Raceways on Exterior Surfaces of Buildings or Other Structures	114
Article 220 Branch-Circuit, Feeder, and Service Calculations	93	225.26 Trees for Conductor Support	115
Part I. General	93	Part II. More Than One Building or Structure	115
220.1 Scope	93	225.30 Number of Supplies	115
220.3 Application of Other Articles	93	225.31 Disconnecting Means	115
220.5 Calculations	94	225.32 Disconnect Location	116
Part II. Branch-Circuit Load Calculations	94	225.33 Maximum Number of Disconnects	117
220.12 General Lighting	94	225.34 Grouping of Disconnects	117
220.14 Other Loads—All Occupancies	95	225.35 Access to Occupants	117
220.18 Maximum Load on a Branch Circuit	99	225.36 Identified as Suitable for Service Equipment	117
Part III. Feeder and Service Calculations	100	225.37 Identification of Multiple Supplies	117
220.40 General	100	225.38 Disconnect Construction	117
220.42 General Lighting Demand Factors	100	225.39 Rating of Disconnecting Means	117
220.43 Commercial—Show Window and Track Lighting Load	100	Article 225 Questions	118
220.44 Commercial—Receptacle Load	101	Article 230 Services	119
220.50 Motor Load	101	Part I. General	120
220.51 Fixed Electric Space-Heating Load	101	230.1 Scope	120
220.52 Dwelling Unit—Small-Appliance and Laundry Load	102	230.2 Number of Services	120
220.53 Dwelling Unit—Appliance Load	102	230.3 Pass Through a Building or Structure	121
220.54 Dwelling Unit—Electric Clothes Dryer Load	102	230.6 Conductors Considered Outside a Building	121
220.55 Dwelling Unit—Electric Ranges and Cooking Appliances	103	230.7 Service Conductors Separate from Other Conductors	121
220.56 Commercial—Kitchen Equipment Load	104	230.8 Raceway Seals	122
220.60 Noncoincident Loads	104	230.9 Clearance from Building Openings	122
220.61 Feeder/Service Neutral Unbalanced Load	104	230.10 Vegetation as Support	123
Part IV. Optional Calculations for Computing Feeder and Service Loads	107	Part II. Overhead Service-Drop Conductors	123
220.82 Dwelling Unit—Optional Load Calculation	107	230.23 Size and Rating	123
		230.24 Clearances	123
		230.26 Point of Attachment	124
		230.27 Means of Attachment	125
		230.28 Service Masts Used as Supports	125

Part III. Underground Service-Lateral Conductors	125	Part V. Plug Fuses, Fuseholders, and Adapters	149
230.31 Size and Rating.....	125	240.51 Edison-Base Fuse	149
230.32 Protection Against Damage	125	240.53 Type S Fuses.....	149
Part IV. Service-Entrance Conductors	125	240.54 Type S Fuses, Adapters, and Fuseholders	149
230.40 Number of Service-Entrance Conductor Sets	125	Part VI. Cartridge Fuses and Fuseholders	149
230.42 Size and Rating.....	126	240.60 General	150
230.43 Wiring Methods.....	126	240.61 Classification	150
230.44 Cable Trays.....	126	Part VII. Circuit Breakers	150
230.46 Spliced Conductors.....	127	240.80 Method of Operation	150
230.50 Protection Against Physical Damage—		240.81 Indicating.....	151
Aboveground	127	240.83 Markings.....	151
230.51 Service Cable Supports	127	240.85 Applications.....	152
230.54 Connections at Weatherheads.....	127	Article 240 Questions.....	153
230.56 High-Leg Identification	128	Article 250 Grounding and Bonding	155
Part V. Service Equipment—General	128	Part I. General	155
230.66 Identified as Suitable for Service Equipment	128	250.1 Scope	155
Part VI. Service Equipment—Disconnecting Means	129	250.2 Definitions	156
230.70 General	129	250.4 General Requirements for Grounding and	
230.71 Number of Disconnects	130	Bonding	160
230.72 Grouping of Disconnects.....	130	250.6 Objectionable Current	164
230.76 Manual or Power Operated	131	250.8 Termination of Grounding and Bonding	
230.79 Rating of Disconnect	131	Conductors.....	168
230.82 Equipment Connected to the Supply Side of		250.10 Protection of Fittings	168
the Service Disconnect.....	131	250.12 Clean Surface	168
Part VII. Service Equipment Overcurrent Protection	132	Part II. System Grounding and Bonding	168
230.90 Overload Protection Required	132	250.20 Systems Required to be Grounded and Bonded	168
230.95 Ground-Fault Protection of Equipment.....	133	250.24 Grounding and Bonding at Service Equipment	170
Article 230 Questions.....	134	250.28 Main Bonding Jumper and System Bonding	
Article 240 Overcurrent Protection	135	Jumper	175
Part I. General	136	250.30 Grounding and Bonding of Separately	
240.1 Scope	136	Derived AC Systems.....	176
240.2 Definitions	136	250.32 Buildings or Structures Supplied by a Feeder or	
240.3 Protection of Equipment.....	137	Branch Circuit	181
240.4 Protection of Conductors.....	137	250.34 Generators—Portable and Vehicle-Mounted.....	183
240.5 Protection of Flexible Cords and Fixture Wires.....	140	250.36 High-Impedance Grounded Neutral Systems.....	184
240.6 Standard Ampere Ratings.....	140	Part III. Grounding Electrode System and Grounding	
240.10 Supplementary Overcurrent Protection	140	Electrode Conductor	184
240.13 Ground-Fault Protection of Equipment.....	141	250.50 Grounding Electrode System	185
Part II. Location	141	250.52 Grounding (Earthing) Electrodes	185
240.20 Ungrounded Conductors.....	141	250.53 Installation of Grounding Electrode System	188
240.21 Overcurrent Protection Location in Circuit.....	142	250.54 Supplementary Electrodes	190
240.24 Location of Overcurrent Protection Devices.....	147	250.56 Resistance of Ground Rod Electrode	190
Part III. Enclosures	148	250.58 Common Grounding (Earthing) Electrode.....	192
240.32 Damp or Wet Locations.....	148	250.60 Lightning Protection System Grounding	
240.33 Vertical Position	149	(Earthing) Electrode	192
		250.62 Grounding Electrode Conductor—Material.....	193
		250.64 Grounding Electrode Conductor Installation	193

250.66 Grounding Electrode Conductor—Size195

250.68 Grounding Electrode Conductor Termination.....196

250.70 Grounding Electrode Conductor Termination
Fitting197

**Part IV. Grounding (Bonding) of Enclosure, Raceway,
and Service Cable**.....197

250.80 Service Enclosures197

250.86 Other Enclosures197

Part V. Bonding198

250.92 Service Bonding198

250.94 Grounding (Bonding) of Communications
Systems.....200

250.96 Bonding Other Enclosures201

250.97 Bonding 277V/480V202

250.100 Bonding—Hazardous (Classified) Locations.....203

250.102 Bonding Jumper203

250.104 Bonding of Piping Systems and Exposed
Structural Metal.....205

250.106 Lightning Protection System208

**Part VI. Equipment Grounding (Bonding) and Equipment
Grounding (Bonding) Conductors**.....209

250.110 Fixed Equipment Connected by Permanent
Wiring Methods—General209

250.112 Fixed Equipment Connected by Permanent
Wiring Methods—Specific.....209

250.114 Equipment Connected by Cord and Plug.....209

250.118 Types of Equipment Grounding (Bonding)
Conductors.....210

250.119 Identification of Equipment Grounding
(Bonding) Conductor.....212

250.122 Sizing Equipment Grounding (Bonding)
Conductor213

250.126 Identification of Wiring Device Terminals.....215

Part VII. Methods of Equipment Grounding (Bonding)215

250.130 Equipment Grounding (Bonding) Conductor
Connections215

250.134 Grounding (Bonding)—Fixed Equipment.....216

250.138 Grounding (Bonding)—Cord-and-Plug
Connected Equipment217

250.140 Grounding (Bonding)—Ranges, Ovens, and
Clothes Dryers217

250.142 Use of Grounded Neutral Conductor for
Equipment Grounding (Bonding).....218

250.146 Connecting Receptacle Grounding Terminal
to Box219

250.148 Continuity and Attachment of Equipment
Grounding (Bonding) Conductors to Boxes221

Article 250 Questions.....223

Article 280 Surge Arresters227

Part I. General227

280.1 Scope227

280.2 Definition.....227

280.3 Number Required227

280.4 Surge Arrester Selection227

Part II. Installation.....228

280.11 Location.....228

280.12 Routing of Conductors228

Part III. Connecting Surge Arresters.....228

280.21 Installed at Services of Less Than 1,000V.....228

280.22 Installed on the Load Side of Services of
Less Than 1,000V.....228

Article 280 Questions.....229

**Article 285 Transient Voltage Surge Suppressors
(TVSSs)**231

Part I. General231

285.1 Scope231

285.2 Definition.....231

285.3 Uses Not Permitted.....231

285.4 Number Required231

285.5 Listing232

285.6 Short-Circuit Current Rating232

Part II. Installation.....232

285.11 Location.....232

285.12 Routing of Conductors232

**Part III. Connecting Transient Voltage Surge
Suppressors**232

285.21 Connection.....232

Article 285 Questions.....233

Chapter 3—Wiring Methods and Materials235

Article 300 Wiring Methods239

Part I. General Requirements.....239

300.1 Scope239

300.3 Conductors.....240

300.4 Protection Against Physical Damage241

300.5 Underground Installations244

300.6 Protection Against Corrosion and Deterioration.....247

300.7 Raceways Exposed to Different Temperatures.....248

300.8 Not Permitted in Raceways249

300.10 Electrical Continuity.....249

300.11 Securing and Supporting250

300.12	Mechanical Continuity	251	314.16	Number of 6 AWG and Smaller Conductors in Boxes and Conduit Bodies	282
300.13	Splices and Pigtails	252	314.17	Conductors That Enter Boxes or Conduit Bodies	285
300.14	Length of Free Conductors	253	314.20	Boxes Recessed in Walls or Ceilings	285
300.15	Boxes or Conduit Bodies	254	314.21	Repairing Gaps Around Boxes	286
300.17	Raceway Sizing	255	314.22	Surface Extensions	286
300.18	Inserting Conductors in Raceways	257	314.23	Support of Boxes and Conduit Bodies	287
300.19	Supporting Conductors in Vertical Raceways	257	314.25	Covers and Canopies	288
300.20	Induced Currents in Metal Parts	257	314.27	Outlet Box	288
300.21	Spread of Fire or Products of Combustion	258	314.28	Boxes and Conduit Bodies for Conductors 4 AWG and Larger	289
300.22	Ducts, Plenums, and Air-Handling Spaces	259	314.29	Wiring to be Accessible	291
300.23	Panels Designed to Allow Access	260	314.30	Handhole Enclosures	291
	Article 300 Questions	262		Article 314 Questions	293
Article 310 Conductors For General Wiring		265	Article 320 Armored Cable (Type AC)		
310.1	Scope	265	Part I. General		
310.2	Conductors	265	320.1 Scope		
310.3	Stranded Conductors	265	320.2 Definition		
310.4	Conductors in Parallel	266	Part II. Installation		
310.5	Minimum Size Conductors	267	320.10 Uses Permitted		
310.8	Location	267	320.12 Uses Not Permitted		
310.9	Corrosive Conditions	268	320.15 Exposed Work		
310.10	Insulation Temperature Limitation	268	320.17 Through or Parallel to Framing Members		
310.12	Conductor Identification	268	320.23 In Accessible Attics or Roof Spaces		
310.13	Conductor Construction	269	320.24 Bends		
310.15	Conductor Ampacity	269	320.30 Secured and Supported		
	Article 310 Questions	275	320.40 Boxes and Fittings		
Article 312 Cabinets, Cutout Boxes, and Meter Socket Enclosures		277	320.80 Conductor Ampacities		
312.1	Scope	277	Part III. Construction Specifications		
Part I. Installation		277	320.100 Construction		
312.2	Damp, Wet, or Hazardous (Classified) Locations	277	320.108 Equipment Grounding (Bonding)		
312.3	Installed in Walls	278	Article 320 Questions		
312.4	Repairing Gaps Around Plaster, Drywall, or Plasterboard Edges	278	Article 330 Metal-Clad Cable (Type MC)		
312.5	Enclosures	278	Part I. General		
312.8	Used for Raceway and Splices	279	330.1 Scope		
	Article 312 Questions	280	330.2 Definition		
Article 314 Outlet, Device, Pull and Junction Boxes, Conduit Bodies, and Handhole Enclosures		281	Part II. Installation		
Part I. Scope and General		281	330.10 Uses Permitted		
314.1	Scope	281	330.12 Uses Not Permitted		
314.3	Nonmetallic Boxes	281	330.17 Through or Parallel to Framing Members		
314.4	Metal Boxes	281	330.23 In Accessible Attics or Roof Spaces		
314.5	Short-Radius Conduit Bodies	282	330.24 Bends		
Part II. Installation		282	Part II. Installation		
314.15	Damp, Wet, or Hazardous (Classified) Locations	282	330.30 Secured and Supported
