HOW TO USE THE NATIONAL ELECTRICAL CODExvii

ARTICLE 90—INTRODUCTION TO THE NATIONAL ELECTRICAL CODE..... 1

90.1 Purpose of the *NEC*..... 1
 90.2 Scope of the *NEC* 2
 90.3 Code Arrangement 4
 90.4 Enforcement..... 5
 90.5 Mandatory Requirements and Explanatory Material..... 6
 90.6 Formal Interpretations..... 7
 90.7 Examination of Equipment for Product Safety 7
 90.9 Units of Measurement 7
 Article 90—Practice Questions..... 8

CHAPTER 1—GENERAL 9

ARTICLE 100—DEFINITIONS11
 Article 100. Definitions—Practice Questions34

ARTICLE 110—REQUIREMENTS FOR ELECTRICAL INSTALLATIONS37

Part I. General Requirements37

110.1 Scope.....37
 110.2 Approval of Conductors and Equipment37
 110.3 Examination, Identification, Installation, and Use of Equipment37
 110.4 Voltages.....38
 110.5 Copper Conductors.....38
 110.6 Conductor Sizes39
 110.7 Wiring Integrity.....39
 110.8 Suitable Wiring Methods40
 110.9 Interrupting Protection Rating.....40
 110.10 Short-Circuit Current Rating41
 110.11 Deteriorating Agents.....41
 110.12 Mechanical Execution of Work.....42
 110.13 Mounting and Cooling of Equipment.....43
 110.14 Conductor Termination and Splicing44
 110.15 High-Leg Conductor Identification.....48
 110.16 Flash Protection Warning48
 110.20 Enclosure Types49
 110.21 Manufacturer’s Markings.....49
 110.22 Identification of Disconnecting Means49

Part II. 600V, Nominal, or Less50

110.26 Spaces About Electrical Equipment50
 110.27 Guarding.....55
 Article 110—Practice Questions.....57

CHAPTER 2—WIRING AND PROTECTION59

ARTICLE 200—USE AND IDENTIFICATION OF GROUNDED CONDUCTORS61

200.1 Scope61
 200.2 General61
 200.6 Neutral Conductor Identification.....62
 200.7 Use of White or Gray Color63
 200.9 Terminal Identification.....64
 200.10 Identification of Terminals.....64
 200.11 Polarity64
 Article 200—Practice Questions.....65

ARTICLE 210—BRANCH CIRCUITS66

Part I. General Provisions67

210.1 Scope67
 210.2 Other Articles.....67
 210.3 Branch-Circuit Rating.....67
 210.4 Multiwire Branch Circuits.....67
 210.5 Identification for Branch Circuits.....69
 210.7 Branch-Circuit Requirements for Devices70
 210.8 GFCI Protection70
 210.11 Branch Circuits Required75
 210.12 Arc-Fault Circuit-Interrupter—Protected Circuits77
 210.18 Guest Rooms and Guest Suites79

Part II. Branch-Circuit Ratings79

210.19 Conductor Sizing79
 210.20 Overcurrent Protection.....80
 210.21 Outlet Device Rating.....81
 210.23 Permissible Loads82
 210.25 Branch Circuits in Buildings with Multiple Occupancies...83

Part III. Required Outlets83

210.50 General83
 210.52 Dwelling Unit Receptacle Outlet Requirements83
 210.60 Receptacles in Guest Rooms, Guest Suites, Dormitories, and Similar Occupancies91
 210.62 Show Windows.....91
 210.63 Heating, Air-Conditioning, and Refrigeration (HACR) Equipment92
 210.70 Lighting Outlet Requirements.....92
 Article 210—Practice Questions.....96

ARTICLE 215—FEEDERS99

215.1 Scope99
 215.2 Minimum Rating.....99
 215.3 Overcurrent Protection.....101
 215.6 Equipment Grounding Conductor101
 215.10 Ground-Fault Protection of Equipment.....101
 215.12 Identification for Feeders102
 Article 215—Practice Questions.....103

Table of Contents

ARTICLE 220—BRANCH-CIRCUIT, FEEDER, AND SERVICE CALCULATIONS

Part I. General	104
220.1 Scope	104
220.3 Application of Other Articles	104
220.5 Calculations	104
Part II. Branch-Circuit Load Calculations	105
220.12 General Lighting	105
220.14 Other Loads—All Occupancies	106
220.18 Maximum Load on a Branch Circuit	109
Part III. Feeder and Service Calculations	111
220.40 General	111
220.42 General Lighting Demand Factors	111
220.43 Commercial—Show Window and Track Lighting Load	111
220.44 Other than Dwelling Unit—Receptacle Load	112
220.50 Motor Load	112
220.51 Fixed Electric Space-Heating Load	113
220.52 Dwelling Unit—Small-Appliance and Laundry Load	113
220.53 Dwelling Unit—Appliance Load	113
220.54 Dwelling Unit—Electric Clothes Dryer Load	114
220.55 Dwelling Unit—Electric Ranges and Cooking Appliances	114
220.56 Commercial—Kitchen Equipment Load	116
220.60 Noncoincident Loads	117
220.61 Feeder/Service Neutral Unbalanced Load	117
Part IV. Optional Calculations for Computing Feeder and Service Loads	119
220.82 Dwelling Unit—Optional Load Calculation	119
220.84 Multifamily—Optional Load Calculation	121
220.85 Optional Calculation—Two Dwelling Units	122
220.87 Determining Existing Loads	122
Article 220—Practice Questions	123
ARTICLE 225—OUTSIDE BRANCH CIRCUITS AND FEEDERS	124
Part I. General Requirements	124
225.1 Scope	124
225.2 Other Articles	124
225.6 Minimum Size of Conductors	125
225.7 Luminaires Installed Outdoors	125
225.15 Supports Over Buildings	125
225.16 Attachment	125
225.17 Masts as Support	126
225.18 Clearance for Overhead Conductors	126
225.19 Clearances from Buildings	127
225.22 Raceways on Exterior Surfaces of Buildings or Other Structures	128
225.26 Trees for Conductor Support	128
Part II. More Than One Building or Structure	128
225.30 Number of Supplies	128
225.31 Disconnecting Means	129
225.32 Disconnect Location	129
225.33 Maximum Number of Disconnects	130
225.34 Grouping of Disconnects	130
225.35 Access to Occupants	130

225.36 Identified as Suitable for Service Equipment	130
225.37 Identification of Multiple Feeders	131
225.38 Disconnect Construction	131
225.39 Rating of Disconnecting Means	131
Article 225—Practice Questions	132

ARTICLE 230—SERVICES

Part I. General	134
230.1 Scope	134
230.2 Number of Services	134
230.3 Not to Pass Through a Building or Structure	135
230.6 Conductors Considered Outside a Building	135
230.7 Service Conductors Separate from Other Conductors	135
230.8 Raceway Seals	136
230.9 Clearance from Building Openings	136
230.10 Vegetation as Support	137
Part II. Overhead Service-Drop Conductors	137
230.23 Size and Rating	137
230.24 Vertical Clearance for Service-Drop Conductors	137
230.26 Point of Attachment	138
230.27 Means of Attachment	138
230.28 Service Masts Used as Supports	139
Part III. Underground Service-Lateral Conductors	139
230.31 Service-Lateral Conductor Size and Rating	139
230.32 Protection Against Damage	139
Part IV. Service-Entrance Conductors	139
230.40 Number of Service-Entrance Conductor Sets	139
230.42 Size and Rating	140
230.43 Wiring Methods	141
230.44 Cable Trays	141
230.46 Spliced Conductors	141
230.50 Protection Against Physical Damage	141
230.51 Service Cable Supports	142
230.54 Overhead Service Locations	142
230.56 High-Leg Identification	142
Part V. Service Equipment—General	143
230.66 Identified as Suitable for Service Equipment	143
Part VI. Service Equipment—Disconnecting Means	143
230.70 General	143
230.71 Number of Disconnects	144
230.72 Grouping of Disconnects	144
230.76 Manual or Power Operated	145
230.79 Rating of Disconnect	145
230.82 Equipment Connected to the Supply Side of the Service Disconnect	146
Part VII. Service Equipment Overcurrent Protection	147
230.90 Overload Protection Required	147
230.95 Ground-Fault Protection of Equipment	147
Article 230—Practice Questions	149
ARTICLE 240—OVERCURRENT PROTECTION	151
Part I. General	151
240.1 Scope	151
240.2 Definitions	152

240.3	Protection of Equipment.....	152
240.4	Protection of Conductors	153
240.5	Protection of Flexible Cords and Fixture Wires.....	156
240.6	Standard Ampere Ratings	156
240.10	Supplementary Overcurrent Protection	157
240.13	Ground-Fault Protection of Equipment.....	157
240.15	Ungrounded Conductors	157
Part II. Location		159
240.21	Overcurrent Protection Location in Circuit.....	159
240.24	Location of Overcurrent Devices	162
Part III. Enclosures		164
240.32	Damp or Wet Locations.....	164
240.33	Vertical Position.....	164
Part V. Plug Fuses, Fuseholders, and Adapters		164
240.51	Edison-Base Fuse.....	164
240.53	Type S Fuses	165
240.54	Type S Fuses, Adapters, and Fuseholders	165
Part VI. Cartridge Fuses and Fuseholders		165
240.60	General	165
240.61	Classification.....	166
Part VII. Circuit Breakers		166
240.80	Method of Operation.....	166
240.81	Indicating.....	166
240.83	Markings.....	166
240.85	Applications.....	167
	Article 240—Practice Questions.....	169
ARTICLE 285—SURGE PROTECTIVE DEVICES (SPDs)		244
Part I. General		244
285.1	Scope	244
285.3	Uses Not Permitted.....	244
285.4	Number Required	244
285.5	Listing.....	244
285.6	Short-Circuit Current Rating	244
Part II. Installation		245
285.11	Location.....	245
285.12	Routing of Conductors	245
Part III. Connecting Surge Protective Devices		245
285.23	Type 1 SPD—Line Side of Service Equipment.....	245
285.24	Type 2 SPD—Feeder Circuits.....	245
285.25	Type 3 SPD—Branch Circuits.....	246
	Article 285—Practice Questions.....	247
