

Clay Luna Bio

I was born and raised in Lawrenceburg, TN. I joined the United States Marine Corps after graduating from Lawrence County High School. After returning from Iraq I received my Associates Degree in Electricity and Electrical Theory from San Diego City College. While in college I began working a solar installation and design company out of San Diego, CA. While there I received my training from a solar expert who had been in the field for over 25 years. I received extensive training from Sharp Electronics, SunPower, SolaTube, Kyocera, SMA, and other various leaders in the solar field. My wife and I moved back to Lawrenceburg, TN in 2009 when I was employed with Tennessee Technology Center at Pulaski. While with the Tech Center I have received further training from the top solar equipment manufacturers both new and old. With the help of the Tech Center, I have obtained my North American Board of Certified Energy Practitioners (NABCEP) Installers Certification, Sharp Solar Installers Certification, Solar Pathfinder Certification, Solmetric Certification, and Enphase Micro Inverter Certification along with helping the Tech Center become practitioners for NABCEP Entry Level Certificate of Knowledge and ETA's Solar Apprentice exams.

Tennessee Technology Center at Pulaski strives to provide competency-based training through traditional and distance learning instructional delivery systems of the highest quality that will qualify individuals for employment and/or advancement in jobs.

Providing high quality training and re-training of employed workers.

Providing high quality training that is economical and accessible to all residents of Tennessee, thereby, contributing to the economic and community development of the communities we serve.
