Hundreds of 2011 Code Books have been Tabbed using this OUTLINE:

---

1 **Mikes Tab sets are marked 1 & 2 - Begin with set 2 placing index tab V-Z 3/16" up from the bottom of the page**
   set the black line of the tabs to the edge of each assending page, touching each line together
   The first tab begins on page 821. The 3/16" spacing will protect it from prematurely tearing

2 **NOTE the 16 tab layout per row fits nicely as described in this document**

Start tabbing your NEC Code book - back to front - set first tab V-Z at bottom of page @821, 3/16" off bottom of page

1 **You will probably use the INDEX Pages more than any other pages in your code book**
   The INDEX is your guide to finding topical words in the NEC CODE BOOK

* **Index KEY WORDS give you section number as a reference - They are found at the top of each page**

2 **Don't forget - the TABLE OF CONTENTS starts on page #2 - It too is VERY USEFUL**
   The Table of CONTENTS references give you *page numbers* **, they are found at the bottom of each page**

3 **Why should I buy the Soft bound code book - When Tabbed as outlined above, the soft copy when folded in**
   half will neatly expose all the tabs for easy reading and quick referencing.

4 **NOTE: By starting to tab your Code Book from back to front - makes aligining each tab a SNAP!**
