set the black line of the tabs to the edge of each ascending page, touching each line together

Start tabbing your NEC Code book - back to front - set first tab V-Z at bottom of page @869, 3/16" off bottom of page

- 1 You will probably use the INDEX Pages more than any other pages in your code book
The INDEX is your guide to finding topical words in the NEC CODE BOOK
* Index KEY WORDS give you section number as a reference - They are found at the top of each page
- 2 Don't forget - the TABLE OF CONTENTS starts on page #2 - It too is VERY USEFUL
The Table of CONTENTS references give you *page numbers*, they are found at the bottom of each page
- 3 Why should I buy the Soft bound code book - When Tabbed as outlined above, the soft copy when folded in half will neatly expose all the tabs for easy reading and quick referencing.
- 4 NOTE: By starting to tab your Code Book from back to front - makes aligning each tab a SNAP!
