Florida State Contractor Class

Your Instructor Assistant

George Cancio has used his years of experience in the electrical field to make a consistent effort to seek out new challenges both in projects and in licensing. He has a passion for sharing his knowledge and helping students to achieve their goals. He joined the Mike Holt team in 2001, wanting to share his insights and appreciation of the field with others.

George has been the President of Cancio Group LLC since 2009, and has been an Electrician for 29 years, having completed an apprenticeship program with ABCI in 1992. As both a Master Electrician and Electrical Contractor he has 16 state electrical licenses. His first-hand experience and understanding of how all of the parts of a project need to come together have been gathered from his years of experience as a contractor in various fields.

George holds licenses in 22 different states in areas that include Electrical, General Contracting, Mechanical/HVAC/HVACR, Plumbing, Roofing, Fire Alarm, and Pool/Spa. He is certified as an Inspector, Plans Examiner, and Code Official in several fields in addition to his licenses. George is no stranger to exam preparation and hard work, and is able to put his proficiency to use on both ends of the spectrum.

George is bilingual in English and Spanish. He enjoys hunting and fishing.
