Start tabbing your NEC Code book - back to front - set first tab V-Z at bottom of page - 871, 3/16" off bottom of page

1 You will probably use the INDEX Pages more than any other pages in your code book

   The INDEX is your guide to finding topical words in the NEC CODE BOOK

* Index KEY WORDS give you section number as a reference - They are found at the top of each page

2 "NEW" -- A TAB FOR THE TABLE OF CONTENTS-- starts on page #1 - It too is VERY USEFUL

   The Table of CONTENTS references give you *page numbers* , they are found at the bottom of each page

3 Why should I buy the Soft bound code book - When Tabbed as outlined above, the soft copy when grasped by
   your left hand - folding it in half will neatly expose all the tabs for easy reading and quick referencing.

4 NOTE: By starting to tab your Code Book from back to front - makes aligning each tab a SNAP!
