About This Textbook	xiii	200.10 Identification of Terminals.....	54
Additional Products to Help You Learn	xvi	Article 210—Branch Circuits	55
How to Use the <i>National Electrical Code</i>	1	210.5 Identification for Branch Circuits.....	55
Global Changes in the 2020 <i>National Electrical Code</i>	9	210.6 Branch-Circuit Voltage Limitations.....	57
Article 90—Introduction to the <i>National Electrical Code</i>	11	210.8 GFCI Protection.....	57
90.2 Scope of the <i>NEC</i>	11	210.11 Branch Circuits Required	67
CHAPTER 1—GENERAL RULES	15	210.12 Arc-Fault Circuit-Interrupter Protection	69
Article 100—Definitions	17	210.15 Reconditioned Equipment.....	70
100 Definitions	17	210.19 Conductor Sizing.....	70
Part III. Definitions, Hazardous (Classified) Locations	21	210.52 Dwelling Unit Receptacle Outlet Requirements.....	72
Article 110—Requirements for Electrical Installations	33	210.63 Equipment Requiring Servicing.....	78
110.3 Examination, Identification, Installation, Use, and Product Listing (Certification) of Equipment.....	33	210.65 Meeting Rooms	79
110.5 Conductor Material	34	210.70 Lighting Outlet Requirements.....	81
110.12 Mechanical Execution of Work	34	Article 215—Feeders	85
110.14 Conductor Termination and Splicing.....	36	215.2 Conductor Sizing.....	85
110.21 Markings	37	215.9 Ground-Fault Circuit-Interrupter Protection for Personnel.....	86
110.22 Identification of Disconnecting Means	38	Article 220—Branch-Circuit, Feeder, and Service Load Calculations	87
110.24 Available Fault Current	38	220.11 Floor Area	87
110.26 Spaces About Electrical Equipment.....	39	220.12 Lighting Load for Non-Dwelling Occupancies	88
110.28 Enclosure Types	47	220.14 Other Loads—Occupancies	90
CHAPTER 2—WIRING AND PROTECTION	49	220.16 Loads for Additions to Existing Installations	92
Article 200—Use and Identification of Grounded Conductors	51	220.42 General Lighting Demand Factors	93
200.3 Connections to Grounded System.....	52	220.53 Appliance Load, Dwelling.....	94
200.6 Identification of Grounded Conductors.....	52	220.60 Noncoincident Loads.....	95
200.9 Means of Identification.....	53	220.87 Determining Existing Loads.....	96
		Article 225—Outside Branch Circuits and Feeders	99
		225.4 Conductor Covering	99
		225.10 Wiring on Buildings (or Other Structures)	99
		225.15 Supports over Buildings	100
		225.19 Clearances from Buildings	100
		225.30 Number of Supplies	102
		Article 230—Services	105
		230.31 Underground Service Conductor Size and Ampacity.....	105
		230.42 Minimum Size and Ampacity	106

230.43	Wiring Methods	106
230.44	Cable Trays	107
230.46	Spliced Conductors.....	107
230.62	Service Equipment—Enclosed or Guarded	108
230.66	Marking for Service Disconnect	109
230.67	Surge Protection	110
230.70	Service Disconnect Requirements.....	111
230.71	Number of Service Disconnects.....	111
230.82	Connected on Supply Side of the Service Disconnect.....	112
230.85	Emergency Disconnects.....	114

Article 240—Overcurrent Protection..... 117

240.2	Definitions	118
240.5	Protection of Flexible Cords, Flexible Cables, and Fixture Wires	118
240.6	Standard Ampere Ratings.....	119
240.21	Location in Circuit	119
240.24	Location of Overcurrent Protective Devices at Premises	123
240.33	Vertical Position	125
240.40	Disconnecting Means for Fuses	125
240.62	Reconditioned Equipment.....	126
240.67	Arc Energy Reduction—Fuses.....	126
240.86	Series Ratings	127
240.87	Arc Energy Reduction—Circuit Breakers	128
240.88	Reconditioned Equipment.....	129
240.91	Protection of Conductors	130

Article 242—Overvoltage Protection..... 131

242	Overvoltage Protection	132
-----	------------------------------	-----

Article 250—Grounding and Bonding..... 137

250.6	Objectionable Current.....	137
250.12	Clean Surfaces	137
250.20	Systems Required to be Grounded	138
250.25	Grounding for Supply Side of the Service Disconnect	139
250.26	Conductor to Be Grounded—Alternating-Current Systems	139
250.28	Main Bonding Jumper and System Bonding Jumper.....	140
250.30	Separately Derived Systems	141
250.32	Buildings Supplied by a Feeder	148
250.34	Generators—Portable and Vehicle- or Trailer-Mounted	149
250.36	High-Impedance Grounded Systems.....	150
250.53	Grounding Electrode Installation Requirements.....	151
250.64	Grounding Electrode Conductor Installation	152
250.68	Grounding Electrode Conductor and Bonding Jumper Connection to Grounding Electrodes	156
250.98	Bonding Loosely Jointed Metal Raceways.....	157
250.104	Bonding of Piping Systems and Exposed Structural Metal	158

Part VI. Equipment Grounding and Equipment Grounding Conductors..... 162

250.109	Metal Enclosures.....	162
250.112	Specific Equipment Fastened in Place (Fixed) or Connected by Permanent Wiring Methods.....	162
250.114	Equipment Connected by Cord and Plug.....	163
250.119	Identification of Equipment Grounding Conductors	164
250.120	Equipment Grounding Conductor Installation.....	165
250.121	Restricted Use of Equipment Grounding Conductors	166
250.122	Sizing Equipment Grounding Conductors.....	166
250.132	Short Sections of Raceway	170
250.136	Equipment Secured to Grounded Metal Supports	171
250.138	Cord-and-Plug-Connected Equipment.....	171
250.146	Connecting Receptacle Grounding Terminal to an Equipment Grounding Conductor.....	172
250.148	Continuity of Equipment Grounding Conductors in Boxes.....	175

CHAPTER 3—WIRING METHODS AND MATERIALS..... 179

Article 300—General Requirements for Wiring Methods and Materials..... 183

300.3	Conductors	183
300.4	Protection Against Physical Damage.....	185
300.7	Raceways Exposed to Different Temperatures.....	186
300.22	Wiring in Ducts and Plenum Spaces.....	186
300.25	Exit Enclosures (Stair Towers).....	187

Article 310—Conductors for General Wiring..... 189

310.1	Scope	189
310.3	Conductors	190
310.4	Conductor Construction and Applications	191
310.6	Conductor Identification.....	193
310.10	Uses Permitted.....	193
310.12	Single-Phase Dwelling Services and Feeders.....	194
310.14	Ampacities for Conductors Rated 0V Through 2,000V	198
310.15	Ampacity Tables.....	199
310.16	Ampacities of Insulated Conductors in Raceways, Cables, or Buried	207

Article 312—Cabinets..... 209

312.5	Enclosures	209
312.6	Deflection of Conductors.....	211
312.8	Overcurrent Device Enclosures	211

Article 314—Outlet, Device, Pull, Junction Boxes; Conduit Bodies; and Handhole Enclosures	213
314.16 Number of Conductors	213
314.17 Conductors That Enter Boxes or Conduit Bodies	219
314.27 Outlet Box Requirements	220
314.29 Boxes, Conduit Bodies, and Handhole Enclosures to Be Accessible.....	222
 Article 320—Armored Cable (Type AC)	223
320.23 In Accessible Attics or Roof Spaces	223
320.80 Conductor Ampacity.....	223
 Article 330—Metal-Clad Cable (Type MC)	225
330.80 Conductor Ampacities.....	225
 Article 334—Nonmetallic-Sheathed Cable (Type NM)	227
334.30 Securing and Supporting	227
 Article 336—Power and Control Tray Cable (Type TC)	229
336.2 Definition.....	229
336.10 Uses Permitted.....	229
 Article 338—Service-Entrance Cable (Types SE and USE)	231
338.2 Definitions	231
338.10 Uses Permitted.....	232
 Article 340—Underground Feeder and Branch-Circuit Cable (Type UF)	235
340.10 Uses Permitted.....	235
340.12 Uses Not permitted.....	236
 Article 342—Intermediate Metal Conduit (Type IMC)	237
342.10 Uses Permitted.....	237
342.14 Dissimilar Metals.....	237
 Article 344—Rigid Metal Conduit (Type RMC)	239
344.10 Uses Permitted.....	239
344.14 Dissimilar Metals.....	239
 Article 350—Liquidtight Flexible Metal Conduit (Type LFMC)	241
350.10 Uses Permitted.....	241
350.12 Uses Not Permitted.....	242
350.30 Securing and Supporting	242

Article 356—Liquidtight Flexible Nonmetallic Conduit (Type LFNC)	245
356.10 Uses Permitted.....	245
 Article 358—Electrical Metallic Tubing (Type EMT)	247
358.10 Uses Permitted.....	247
 Article 380—Multioutlet Assemblies	249
380.12 Uses Not Permitted.....	249
 Article 392—Cable Trays	251
392.10 Uses Permitted.....	251
392.18 Cable Tray Installations	252
392.30 Securing and Supporting	252
392.44 Expansion Splice Plates	252
392.46 Bushed Conduit and Tubing.....	253

CHAPTER 4—EQUIPMENT FOR GENERAL USE.....255

Article 400—Flexible Cords and Flexible Cables	257
400.12 Uses Not Permitted.....	257
400.17 Protection from Damage	259

Article 402—Fixture Wires	261
402.3 (Fixture Wire) Types.....	261

Article 404—Switches	263
404.2 Switch Connections.....	263
404.4 Damp or Wet Locations	265
404.7 Indicating	266
404.9 General-Use Snap Switches, Dimmers, and Control Switches	267
404.10 Mounting of General-Use Snap Switches, Dimmers, and Control Switches.....	269
404.12 Grounding of Enclosures	269
404.14 Rating and Use of Switches.....	270

Article 406—Receptacles and Attachment Plugs (Caps)	271
406.2 Definitions	271
406.3 Receptacle Rating and Type	271
406.4 General Installation Requirements.....	273
406.5 Receptacle Mounting.....	275
406.7 Attachment Plugs, Cord Connectors and Flanged Surface Devices.....	276
406.9 Receptacles in Damp or Wet Locations.....	277

406.10	Grounding-Type Receptacles, Adapters, Cord Connectors, and Attachment Plugs	278
406.12	Tamper-Resistant Receptacles	278

Article 408—Switchboards and Panelboards	281
408.3 Arrangement of Busbars and Conductors.....	281
408.4 Field Identification.....	281
408.6 Short-Circuit Current Rating.....	282
408.8 Reconditioning of Equipment	283
408.18 Clearances	284
408.23 Power Monitoring and Energy Management Equipment	285
408.36 Overcurrent Protection	285
408.43 Panelboard Orientation.....	285

Article 410—Luminaires, Lampholders, and Lamps	287
410.2 Definitions	287
410.7 Reconditioned Equipment	288
410.10 Luminaires in Specific Locations	288
410.16 Luminaires in Clothes Closets	289
410.22 Outlet Boxes to Be Covered	291
410.36 Means of Support	291
410.40 General	291
410.44 Methods of Grounding, Exceptions	292
410.116 Clearance and Installation	292
410.118 Access to Other Boxes	293

Part XVI. Special Provisions for Horticultural Lighting Equipment	293
--	-----

Article 411—Low-Voltage Lighting	295
411.4 Listing Required	295

Article 422—Appliances	297
422.5 GFCI Protection.....	297
422.6 Listing Required.....	299
422.10 Branch Circuits.....	299
422.13 Storage-Type Water-Heaters.....	300
422.16 Flexible Cords.....	301
422.19 Space for Conductors.....	302
422.22 Utilizing Separable Attachment Fittings.....	303
422.31 Permanently Connected Appliance Disconnects.....	303

Article 424—Fixed Electric Space-Heating Equipment		305
424.1	Scope	305
424.4	Branch Circuits, Branch-Circuit Requirements	306
424.19	Disconnecting Means	307
424.44	Electric Heating Cables in Concrete or Masonry Floors.....	308

Article 430—Motors, Motor Circuits, and Controllers	309
430.2 Definitions.....	309
430.32 Continuous-Duty Motors	310
430.99 Available Fault Current	310
430.122 Conductor Sizing	311
430.130 Branch-Circuit Short-Circuit and Ground-Fault Protection.....	313

Article 440—Air-Conditioning and Refrigeration Equipment		315
440.9	Grounding and Bonding.....	315
440.10	Short-Circuit Current Rating.....	316
440.32	Single Motor-Compressor	316

Article 445—Generators	319
445.6 Listing.....	319
445.18 Disconnecting Means and Emergency Shutdown.....	319

Article 450—Transformers	321
450.9 Ventilation	321
450.14 Disconnecting Means	322

Article 480—Storage Batteries	323
480.2 Definitions.....	323
480.4 Battery and Cell Terminations	324
480.7 DC Disconnect Methods	324
480.10 Battery Locations.....	325
480.12 Battery Interconnections.....	326
480.13 Ground-Fault Detection	326

CHAPTER 5—SPECIAL OCCUPANCIES

Article 500—Hazardous (Classified) Locations	329
500.1 Scope—Articles 500 Through 503 Informational Notes	330
500.4 Documentation	330
500.5 Classifications of Hazardous Locations	331
500.7 Protection Techniques	332
500.8 Equipment Involving Optical Radiation	333

Article 501—Class I Hazardous (Classified)	
Locations	335
501.10 Wiring Methods.....	335
501.15 Raceway and Cable Seals.....	336
501.105 Meters, Instruments, and Relays.....	338

Article 502—Class II Hazardous (Classified)

Locations	339
502.10 Wiring Methods	339
502.150 Signaling, Alarm, Remote-Control, and Communications Systems; Meters, Instruments, and Relays.....	342

Article 503—Class III Hazardous (Classified)

Locations	343
503.10 Wiring Methods	343

Article 511—Commercial Garages, Repair and Storage

.....	345
511.1 Scope	345
511.3 Area Classification, General.....	346
511.8 Underground Wiring Below Class I Locations.....	346
511.12 Ground-Fault Circuit-Interrupter Protection for Personal	347

Article 514—Motor Fuel Dispensing Facilities

.....	349
514.1 Scope	349
514.3 Classification of Locations	350
514.11 Emergency Electrical Disconnects.....	350

Article 517—Health Care Facilities

.....	351
517 Health Care Facilities	351
517.2 Definitions	352
517.10 Applicability	352
517.13 Equipment Grounding Conductor for Receptacles and Fixed Electrical Equipment in Patient Care Spaces.....	353
517.16 Use of Isolated Ground Receptacles.....	356

Article 518—Assembly Occupancies

.....	359
518.6 Illumination	359

Article 525—Carnivals, Circuses, Fairs, and Similar Events

.....	361
525.20 Wiring Methods	361
525.23 GFCI-Protection.....	362

Article 547—Agricultural Buildings

.....	363
547.2 Definitions	363
547.5 Wiring Methods	364
547.9 Electrical Supply to Buildings or Structures from a Distribution Point.....	365

Article 550—Mobile Homes, Manufactured Homes, and Mobile Home Parks

.....	367
550.13 Receptacle Outlets.....	367

550.15 Wiring Methods and Materials.....	368
--	-----

Article 555—Marinas, Boatyards, and Docking Facilities

.....	369
555 Marinas, Boatyards, Floating Buildings, and Commercial and Noncommercial Docking Facilities	369
555.1 Scope	369
555.2 Definitions	370
555.3 Electrical Datum Plane Distances	371
555.4 Location of Service Equipment	373
555.5 Maximum Voltage	373
555.7 Transformers	373
555.9 Boat Hoists.....	374
555.13 Bonding of Noncurrent-Carrying Metal Parts	374

Part II. Marinas, Boatyards, and Docking Facilities

.....	375
555.30 Electrical Connections.....	375
555.33 Receptacles	376
555.34 Wiring Methods and Installation.....	376
555.35 Ground-Fault Protection of Equipment (GFPE) and Ground-Fault Circuit-Interrupter (GFCI) Protection.....	376
555.37 Equipment Grounding Conductor.....	377

Part III. Floating Buildings**Article 590—Temporary Installations**

.....	379
590.4 General.....	379
590.6 GFCI Protection for Personnel.....	380
590.8 Overcurrent Protective Devices.....	380

CHAPTER 6—SPECIAL EQUIPMENT**Article 600—Electric Signs and Outline Lighting**

.....	383
600.2 Definitions	383
600.3 Listing.....	384
600.4 Markings	385
600.5 Branch Circuits.....	385
600.6 Disconnecting Means	387
600.35 Retrofit Kits.....	389

Article 620—Elevators, Escalators, and Moving Walks, Platform Lifts, and Stairway Chair Lifts

.....	391
620.6 GFCI Protection for Personnel.....	391
620.22 Branch Circuits for Elevator Car(s).....	392
620.51 Disconnecting Means	393

Article 625—Electric Vehicle Power Transfer System

625.1	Scope	395
625.2	Definitions	396
625.5	Listed	397
625.41	Overcurrent Protection	398
625.42	Rating	398
625.48	Interactive Systems	399
625.54	GFCI Protection for Personnel	399
625.60	AC Receptacle Outlets Used for EVPE	400

Article 645—Information Technology Equipment (ITE)

645.5	Supply Circuits and Interconnecting Cables	401
-------	--	-----

Article 680—Swimming Pools, Spas, Hot Tubs, Fountains, and Similar Installations

680.2	Definitions	403
680.3	Approval of Equipment	405
680.4	Inspections After Installation	406
680.5	Ground-Fault Circuit Interrupters	406
680.6	Bonding and Equipment Grounding	407
680.7	Bonding and Equipment Grounding Terminals	407
680.11	Underground Wiring	408
680.14	Wiring Methods in Corrosive Environment	408
680.21	Motors (for permanently installed pools)	409
680.22	Lighting, Receptacles, and Equipment	411
680.23	Underwater Pool Luminaires	413
680.25	Feeders	415
680.26	Equipotential Bonding	415

Part III. Storable Pools, Storable Spas, Storable Hot Tubs, and Storable Immersion Pools

680.31	Pumps	419
680.35	Storable and Portable Immersion Pools	419
680.45	Permanently Installed Immersion Pools	420
680.50	General	420
680.54	Grounding and Bonding	421
680.59	GFCI Protection for Permanently Installed Nonsubmersible Pumps	421
680.80	General	422
680.84	Switching Devices and Receptacles	422

Article 690—Solar Photovoltaic (PV) Systems

690.2	Definitions	423
690.4	General Requirements	428
690.6	Alternating-Current Modules and Systems	429
690.7	Maximum Voltage	430
690.8	Circuit Sizing and Current	431
690.9	Overcurrent Protection	436

690.11	Arc-Fault Circuit Protection (Direct Current)	438
690.12	Rapid Shutdown of PV Systems on Buildings	438
690.13	Photovoltaic System Disconnecting Means	440
690.15	Disconnecting Means for Isolating Photovoltaic Equipment	443

Part IV. Wiring Methods and Materials

690.31	Wiring Methods	445
690.33	Connectors	452
690.41	System Grounding	453
690.43	Equipment Grounding and Bonding	454
690.45	Size of Equipment Grounding Conductors	456
690.47	Grounding Electrode System	457
690.51	Modules and Alternating-Current Modules	457
690.53	DC PV Circuits	458
690.56	Identification of Power Sources	458

Article 691—Large-Scale Photovoltaic (PV) Electric Supply Stations

691.1	Scope	461
691.9	Disconnecting Means for Isolating Photovoltaic Equipment	462
691.11	Fence Bonding and Grounding	463

Article 694—Wind Electric Systems

694.22	Additional Provisions	465
694.54	Identification of Power Sources	466

Article 695—Fire Pumps

695.3	Power Source(s) for Electric Motor-Driven Fire Pumps	467
695.4	Continuity of Power	468
695.6	Power Wiring	469
695.10	Listed Equipment	470

CHAPTER 7—SPECIAL CONDITIONS

Article 700—Emergency Systems

700.2	Definitions	473
700.4	Capacity and Rating	474
700.5	Transfer Equipment	474
700.6	Signals	474
700.12	General Requirements	475
700.16	Emergency Illumination	477
700.32	Selective Coordination, Informational Note and Informational Note Figure	478

Article 701—Legally Required Standby Systems

701.4	Capacity and Rating	481
701.5	Transfer Equipment	481
701.12	General Requirements	482

Part IV. Overcurrent Protection

Article 702—Optional Standby Systems	485	Article 712—Direct Current Microgrids	525
702.2 Definition	485	712.2 Definitions	525
702.4 Capacity and Rating	486	712.10 Directory	525
702.5 Transfer Equipment	487	712.25 Identification of Circuit Conductors	526
702.7 Signs	488	712.34 DC Source Disconnecting Means	526
		712.65 Available DC Fault Current	526
Article 705—Interconnected Electric Power Production Sources	491	Article 725—Remote-Control, Signaling, and Power-Limited Circuits	527
705.2 Definitions	491	725.2 Definitions	527
705.6 Equipment Approval	492	725.3 Other Articles	528
705.10 Identification of Power Sources	492	725.24 Mechanical Execution of Work, Informational Note	532
705.11 Supply-Side Source Connections	493	725.48 Conductors of Different Circuits in the Same Cable, Cable Tray, Enclosure, or Raceway	533
705.12 Load-Side Source Connections	495	725.121 Power Sources for Class 2 and Class 3 Circuits	534
705.13 Power Control Systems	501	725.135 Installation of Class 2 Cables	535
705.20 Disconnecting Means, Source	502	725.139 Conductors of Different Circuits in Same Cable, Enclosure, Cable Tray, Raceway, or Cable Routing Assembly	536
705.25 Wiring Methods	504	725.144 Transmission of Power and Data	536
705.28 Circuit Sizing and Current	504		
705.30 Overcurrent Protection	505	Article 760—Fire Alarm Systems	539
705.32 Ground Fault Protection	506	760.3 Other Articles	539
705.40 Loss of Primary Source	507	760.24 Mechanical Execution of Work	540
705.45 Unbalanced Interconnections	508	760.121 Power Sources for Power-Limited Fire Alarm Circuits	541
Parts II and III	509	Article 770—Optical Fiber Cables and Raceways	543
705.50 System Operation	509	770 Informational Note	543
705.60 Primary Power Source Connection	509	770.24 Mechanical Execution of Work	543
705.70 Microgrid Interconnect Devices (MID)	510		
Article 706—Energy Storage Systems	511	CHAPTER 8—COMMUNICATIONS SYSTEMS	545
706.1 Scope	511	Article 800—General Requirements for Communications Systems	547
706.2 Definitions	512	800.1 Scope	547
706.3 Qualified Personnel	513	800.2 Definitions	548
706.4 System Requirements	514	800.3 Other Articles	549
706.5 Listing	514	800.49 Metal Entrance Conduit Grounding	551
706.7 Maintenance	514	800.53 Separation from Lighting Conductors	551
706.9 Maximum Voltage	515	800.100 Cable and Primary Protector Bonding and Grounding	551
Part II. Disconnecting Means	515	800.110 Raceways, Cable Routing Assemblies, and Cable Trays	555
706.16 Connection to Energy Sources	517	800.113 Installation of Wires, Cables, Cable Routing Assemblies, and Communications Raceways	557
Part III. Installation Requirements	517	800.154 Applications of Listed Communications Wires, Cables, and Raceways, and Listed Cable Routing Assemblies	558
706.21 Directory (Identification of Power Sources)	518	800.179 Plenum, Riser, General-Purpose, and Limited Use Cables	559
Part IV. Circuit Requirements	519		
706.30 Circuit Sizing and Current	519		
706.31 Overcurrent Protection	520		
Article 710—Stand-Alone Systems	521		
710.1 Scope	521		
710.6 Equipment Approval	522		
710.10 Identification of Power Sources	523		
710.12 Stand-Alone Inverter Input Circuit Current	523		
710.15 General	523		

Article 805—General Requirements for Communications Circuits.....561

805.93 Grounding, Bonding, or Interruption of Non-Current-Carrying Metallic Sheath Members of Communications Cables.....561

805.133 Installation of Communications Wires, Cables, and Equipment.....562

805.154 Substitutions of Listed Communications Wires, Cables, and Raceways, and Listed Cable Routing Assemblies563

Article 810—Radio and Television Satellite Equipment.....565

810.21 Bonding Conductors and Grounding Electrode Conductors—Receiving Stations565

Article 820—Community Antenna Television (CATV) and Radio Distribution Systems (Coaxial Cable)567

820.3 Other Articles.....567

820.44 Overhead (Aerial) Coaxial Cables.....567

820.100 Cable Bonding and Grounding.....568

820.154 Substitutions of Listed CATV Cables.....568

2020 National Electrical Code Changes Review Quiz.....569
