*SNAPZ Master Electrician is an industry-leading test software, written by electricians for electricians to practice answering questions in a simulated exam environment. It is very easy and versatile to use—with a click of the mouse, you can skip a question, advance to the next unanswered question and flag a question for later reference. The easy-to-read on-screen displays tell you at a glance exactly what your current test status is – and you can save your work and return later to exactly where you left off. Learn how to come up with the answer, every time... with no ambiguity and no wasted time.

Use the program's **Test Mode** to find out what you already know...and what you don't:

Tests are timed and graded, and your results are analyzed for areas for improvement. You can print tests and test results for take-away study. Test questions are randomized each time so you can practice over and over.

Then use **Study Mode** to drill down only on the areas where you are weak:

In Study mode you get unlimited time to take tests. The program also gives you a hint when you get stuck and shows the step-by-step solution to every question.

The Snapz Master Electrician program comes pre-loaded with:

- three complete, 80-question Journeyman Electrician practice exams
- two bonus Snapz Code Mapper Speed Drill exams to improve your speed and accuracy
