

# Mike Holt's Journeyman Intermediate Video Program

This document includes the Table of Contents from each book so you can see the full scope of this library.

Title	page #
Changes to the NEC.....	2
Electrical Exam Preparation .....	10
Journeyman Electrician Practice Exam .....	15

## Table of Contents

# Changes to the National Electrical Code®

## TABLE OF CONTENTS

<b>About This Textbook .....</b>	xiii	200.10 Identification of Terminals.....	54
<b>Additional Products to Help You Learn.....</b>	xvi		
<b>How to Use the <i>National Electrical Code</i> .....</b>	1		
<b>Global Changes in the 2020 <i>National Electrical Code</i> .....</b>	9		
<b>Article 90—Introduction to the <i>National Electrical Code</i> .....</b>	11		
90.2 Scope of the <i>NEC</i> .....	11		
<b>CHAPTER 1—GENERAL RULES .....</b>	15		
<b>Article 100—Definitions .....</b>	17		
100 Definitions .....	17		
<b>Part III. Definitions, Hazardous (Classified) Locations .....</b>	21		
<b>Article 110—Requirements for Electrical Installations .....</b>	33		
110.3 Examination, Identification, Installation, Use, and Product Listing (Certification) of Equipment.....	33		
110.5 Conductor Material .....	34		
110.12 Mechanical Execution of Work .....	34		
110.14 Conductor Termination and Splicing.....	36		
110.21 Markings .....	37		
110.22 Identification of Disconnecting Means .....	38		
110.24 Available Fault Current .....	38		
110.26 Spaces About Electrical Equipment.....	39		
110.28 Enclosure Types .....	47		
<b>CHAPTER 2—WIRING AND PROTECTION .....</b>	49		
<b>Article 200—Use and Identification of Grounded Conductors .....</b>	51		
200.3 Connections to Grounded System.....	52		
200.6 Identification of Grounded Conductors.....	52		
200.9 Means of Identification.....	53		
<b>Article 210—Branch Circuits .....</b>	55		
210.5 Identification for Branch Circuits.....	55		
210.6 Branch-Circuit Voltage Limitations.....	57		
210.8 GFCI Protection.....	57		
210.11 Branch Circuits Required .....	67		
210.12 Arc-Fault Circuit-Interrupter Protection .....	69		
210.15 Reconditioned Equipment.....	70		
210.19 Conductor Sizing .....	70		
210.52 Dwelling Unit Receptacle Outlet Requirements.....	72		
210.63 Equipment Requiring Servicing .....	78		
210.65 Meeting Rooms .....	79		
210.70 Lighting Outlet Requirements.....	81		
<b>Article 215—Feeders .....</b>	85		
215.2 Conductor Sizing .....	85		
215.9 Ground-Fault Circuit-Interrupter Protection for Personnel.....	86		
<b>Article 220—Branch-Circuit, Feeder, and Service Load Calculations .....</b>	87		
220.11 Floor Area .....	87		
220.12 Lighting Load for Non-Dwelling Occupancies .....	88		
220.14 Other Loads—Occupancies .....	90		
220.16 Loads for Additions to Existing Installations .....	92		
220.42 General Lighting Demand Factors .....	93		
220.53 Appliance Load, Dwelling .....	94		
220.60 Noncoincident Loads .....	95		
220.87 Determining Existing Loads .....	96		
<b>Article 225—Outside Branch Circuits and Feeders .....</b>	99		
225.4 Conductor Covering .....	99		
225.10 Wiring on Buildings (or Other Structures) .....	99		
225.15 Supports over Buildings .....	100		
225.19 Clearances from Buildings .....	100		
225.30 Number of Supplies .....	102		
<b>Article 230—Services .....</b>	105		
230.31 Underground Service Conductor Size and Ampacity .....	105		
230.42 Minimum Size and Ampacity .....	106		

230.43	Wiring Methods .....	106	<b>Part VI. Equipment Grounding and Equipment Grounding Conductors</b> .....	162																																																																																																					
230.44	Cable Trays .....	107	250.109 Metal Enclosures.....	162																																																																																																					
230.46	Spliced Conductors.....	107	250.112 Specific Equipment Fastened in Place (Fixed) or Connected by Permanent Wiring Methods.....	162																																																																																																					
230.62	Service Equipment—Enclosed or Guarded .....	108	250.114 Equipment Connected by Cord and Plug.....	163																																																																																																					
230.66	Marking for Service Disconnect .....	109	250.119 Identification of Equipment Grounding Conductors .....	164																																																																																																					
230.67	Surge Protection .....	110	250.120 Equipment Grounding Conductor Installation.....	165																																																																																																					
230.70	Service Disconnect Requirements.....	111	250.121 Restricted Use of Equipment Grounding Conductors .....	166																																																																																																					
230.71	Number of Service Disconnects.....	111	250.122 Sizing Equipment Grounding Conductors.....	166																																																																																																					
230.82	Connected on Supply Side of the Service Disconnect.....	112	250.132 Short Sections of Raceway .....	170																																																																																																					
230.85	Emergency Disconnects.....	114	250.136 Equipment Secured to Grounded Metal Supports .....	171																																																																																																					
<b>Article 240—Overcurrent Protection</b> .....				117																																																																																																					
240.2	Definitions .....	118	250.138 Cord-and-Plug-Connected Equipment.....	171																																																																																																					
240.5	Protection of Flexible Cords, Flexible Cables, and Fixture Wires .....	118	250.146 Connecting Receptacle Grounding Terminal to an Equipment Grounding Conductor.....	172																																																																																																					
240.6	Standard Ampere Ratings.....	119	250.148 Continuity of Equipment Grounding Conductors in Boxes.....	175																																																																																																					
240.21	Location in Circuit .....	119																																																																																																							
240.24	Location of Overcurrent Protective Devices at Premises .....	123																																																																																																							
240.33	Vertical Position .....	125																																																																																																							
240.40	Disconnecting Means for Fuses .....	125																																																																																																							
240.62	Reconditioned Equipment.....	126																																																																																																							
240.67	Arc Energy Reduction—Fuses.....	126																																																																																																							
240.86	Series Ratings .....	127																																																																																																							
240.87	Arc Energy Reduction—Circuit Breakers .....	128																																																																																																							
240.88	Reconditioned Equipment.....	129																																																																																																							
240.91	Protection of Conductors .....	130																																																																																																							
<b>Article 242—Overvoltage Protection</b> .....				131																																																																																																					
242	Overvoltage Protection.....	132																																																																																																							
<b>Article 250—Grounding and Bonding</b> .....				137																																																																																																					
250.6	Objectionable Current.....	137	<b>Article 300—General Requirements for Wiring Methods and Materials</b> .....	179																																																																																																					
250.12	Clean Surfaces .....	137	300.3	Conductors .....	183	250.20	Systems Required to be Grounded .....	138	300.4	Protection Against Physical Damage .....	185	250.25	Grounding for Supply Side of the Service Disconnect .....	139	300.7	Raceways Exposed to Different Temperatures.....	186	250.26	Conductor to Be Grounded—Alternating-Current Systems .....	139	300.22	Wiring in Ducts and Plenum Spaces .....	186	250.28	Main Bonding Jumper and System Bonding Jumper.....	140	300.25	Exit Enclosures (Stair Towers).....	187	250.30	Separately Derived Systems .....	141	250.32	Buildings Supplied by a Feeder .....	148	<b>Article 310—Conductors for General Wiring</b> .....	189	250.34	Generators—Portable and Vehicle- or Trailer-Mounted .....	149	310.1	Scope .....	189	250.36	High-Impedance Grounded Systems.....	150	310.3	Conductors .....	190	250.53	Grounding Electrode Installation Requirements.....	151	310.4	Conductor Construction and Applications .....	191	250.64	Grounding Electrode Conductor Installation .....	152	310.6	Conductor Identification.....	193	250.68	Grounding Electrode Conductor and Bonding Jumper Connection to Grounding Electrodes .....	156	310.10	Uses Permitted .....	193	250.98	Bonding Loosely Jointed Metal Raceways.....	157	310.12	Single-Phase Dwelling Services and Feeders .....	194	250.104	Bonding of Piping Systems and Exposed Structural Metal ....	158	310.14	Ampacities for Conductors Rated 0V Through 2,000V .....	198				310.15	Ampacity Tables .....	199				310.16	Ampacities of Insulated Conductors in Raceways, Cables, or Buried .....	207	<b>Article 312—Cabinets</b> .....				209	312.5	Enclosures .....	209	312.6	Deflection of Conductors.....	211	312.8	Overcurrent Device Enclosures .....	211
300.3	Conductors .....	183																																																																																																							
250.20	Systems Required to be Grounded .....	138	300.4	Protection Against Physical Damage .....	185	250.25	Grounding for Supply Side of the Service Disconnect .....	139	300.7	Raceways Exposed to Different Temperatures.....	186	250.26	Conductor to Be Grounded—Alternating-Current Systems .....	139	300.22	Wiring in Ducts and Plenum Spaces .....	186	250.28	Main Bonding Jumper and System Bonding Jumper.....	140	300.25	Exit Enclosures (Stair Towers).....	187	250.30	Separately Derived Systems .....	141	250.32	Buildings Supplied by a Feeder .....	148	<b>Article 310—Conductors for General Wiring</b> .....	189	250.34	Generators—Portable and Vehicle- or Trailer-Mounted .....	149	310.1	Scope .....	189	250.36	High-Impedance Grounded Systems.....	150	310.3	Conductors .....	190	250.53	Grounding Electrode Installation Requirements.....	151	310.4	Conductor Construction and Applications .....	191	250.64	Grounding Electrode Conductor Installation .....	152	310.6	Conductor Identification.....	193	250.68	Grounding Electrode Conductor and Bonding Jumper Connection to Grounding Electrodes .....	156	310.10	Uses Permitted .....	193	250.98	Bonding Loosely Jointed Metal Raceways.....	157	310.12	Single-Phase Dwelling Services and Feeders .....	194	250.104	Bonding of Piping Systems and Exposed Structural Metal ....	158	310.14	Ampacities for Conductors Rated 0V Through 2,000V .....	198				310.15	Ampacity Tables .....	199				310.16	Ampacities of Insulated Conductors in Raceways, Cables, or Buried .....	207	<b>Article 312—Cabinets</b> .....				209	312.5	Enclosures .....	209	312.6	Deflection of Conductors.....	211	312.8	Overcurrent Device Enclosures .....	211						
300.4	Protection Against Physical Damage .....	185																																																																																																							
250.25	Grounding for Supply Side of the Service Disconnect .....	139	300.7	Raceways Exposed to Different Temperatures.....	186	250.26	Conductor to Be Grounded—Alternating-Current Systems .....	139	300.22	Wiring in Ducts and Plenum Spaces .....	186	250.28	Main Bonding Jumper and System Bonding Jumper.....	140	300.25	Exit Enclosures (Stair Towers).....	187	250.30	Separately Derived Systems .....	141	250.32	Buildings Supplied by a Feeder .....	148	<b>Article 310—Conductors for General Wiring</b> .....	189	250.34	Generators—Portable and Vehicle- or Trailer-Mounted .....	149	310.1	Scope .....	189	250.36	High-Impedance Grounded Systems.....	150	310.3	Conductors .....	190	250.53	Grounding Electrode Installation Requirements.....	151	310.4	Conductor Construction and Applications .....	191	250.64	Grounding Electrode Conductor Installation .....	152	310.6	Conductor Identification.....	193	250.68	Grounding Electrode Conductor and Bonding Jumper Connection to Grounding Electrodes .....	156	310.10	Uses Permitted .....	193	250.98	Bonding Loosely Jointed Metal Raceways.....	157	310.12	Single-Phase Dwelling Services and Feeders .....	194	250.104	Bonding of Piping Systems and Exposed Structural Metal ....	158	310.14	Ampacities for Conductors Rated 0V Through 2,000V .....	198				310.15	Ampacity Tables .....	199				310.16	Ampacities of Insulated Conductors in Raceways, Cables, or Buried .....	207	<b>Article 312—Cabinets</b> .....				209	312.5	Enclosures .....	209	312.6	Deflection of Conductors.....	211	312.8	Overcurrent Device Enclosures .....	211												
300.7	Raceways Exposed to Different Temperatures.....	186																																																																																																							
250.26	Conductor to Be Grounded—Alternating-Current Systems .....	139	300.22	Wiring in Ducts and Plenum Spaces .....	186	250.28	Main Bonding Jumper and System Bonding Jumper.....	140	300.25	Exit Enclosures (Stair Towers).....	187	250.30	Separately Derived Systems .....	141	250.32	Buildings Supplied by a Feeder .....	148	<b>Article 310—Conductors for General Wiring</b> .....	189	250.34	Generators—Portable and Vehicle- or Trailer-Mounted .....	149	310.1	Scope .....	189	250.36	High-Impedance Grounded Systems.....	150	310.3	Conductors .....	190	250.53	Grounding Electrode Installation Requirements.....	151	310.4	Conductor Construction and Applications .....	191	250.64	Grounding Electrode Conductor Installation .....	152	310.6	Conductor Identification.....	193	250.68	Grounding Electrode Conductor and Bonding Jumper Connection to Grounding Electrodes .....	156	310.10	Uses Permitted .....	193	250.98	Bonding Loosely Jointed Metal Raceways.....	157	310.12	Single-Phase Dwelling Services and Feeders .....	194	250.104	Bonding of Piping Systems and Exposed Structural Metal ....	158	310.14	Ampacities for Conductors Rated 0V Through 2,000V .....	198				310.15	Ampacity Tables .....	199				310.16	Ampacities of Insulated Conductors in Raceways, Cables, or Buried .....	207	<b>Article 312—Cabinets</b> .....				209	312.5	Enclosures .....	209	312.6	Deflection of Conductors.....	211	312.8	Overcurrent Device Enclosures .....	211																		
300.22	Wiring in Ducts and Plenum Spaces .....	186																																																																																																							
250.28	Main Bonding Jumper and System Bonding Jumper.....	140	300.25	Exit Enclosures (Stair Towers).....	187	250.30	Separately Derived Systems .....	141	250.32	Buildings Supplied by a Feeder .....	148	<b>Article 310—Conductors for General Wiring</b> .....	189	250.34	Generators—Portable and Vehicle- or Trailer-Mounted .....	149	310.1	Scope .....	189	250.36	High-Impedance Grounded Systems.....	150	310.3	Conductors .....	190	250.53	Grounding Electrode Installation Requirements.....	151	310.4	Conductor Construction and Applications .....	191	250.64	Grounding Electrode Conductor Installation .....	152	310.6	Conductor Identification.....	193	250.68	Grounding Electrode Conductor and Bonding Jumper Connection to Grounding Electrodes .....	156	310.10	Uses Permitted .....	193	250.98	Bonding Loosely Jointed Metal Raceways.....	157	310.12	Single-Phase Dwelling Services and Feeders .....	194	250.104	Bonding of Piping Systems and Exposed Structural Metal ....	158	310.14	Ampacities for Conductors Rated 0V Through 2,000V .....	198				310.15	Ampacity Tables .....	199				310.16	Ampacities of Insulated Conductors in Raceways, Cables, or Buried .....	207	<b>Article 312—Cabinets</b> .....				209	312.5	Enclosures .....	209	312.6	Deflection of Conductors.....	211	312.8	Overcurrent Device Enclosures .....	211																								
300.25	Exit Enclosures (Stair Towers).....	187																																																																																																							
250.30	Separately Derived Systems .....	141																																																																																																							
250.32	Buildings Supplied by a Feeder .....	148	<b>Article 310—Conductors for General Wiring</b> .....	189																																																																																																					
250.34	Generators—Portable and Vehicle- or Trailer-Mounted .....	149	310.1	Scope .....	189	250.36	High-Impedance Grounded Systems.....	150	310.3	Conductors .....	190	250.53	Grounding Electrode Installation Requirements.....	151	310.4	Conductor Construction and Applications .....	191	250.64	Grounding Electrode Conductor Installation .....	152	310.6	Conductor Identification.....	193	250.68	Grounding Electrode Conductor and Bonding Jumper Connection to Grounding Electrodes .....	156	310.10	Uses Permitted .....	193	250.98	Bonding Loosely Jointed Metal Raceways.....	157	310.12	Single-Phase Dwelling Services and Feeders .....	194	250.104	Bonding of Piping Systems and Exposed Structural Metal ....	158	310.14	Ampacities for Conductors Rated 0V Through 2,000V .....	198				310.15	Ampacity Tables .....	199				310.16	Ampacities of Insulated Conductors in Raceways, Cables, or Buried .....	207	<b>Article 312—Cabinets</b> .....				209	312.5	Enclosures .....	209	312.6	Deflection of Conductors.....	211	312.8	Overcurrent Device Enclosures .....	211																																						
310.1	Scope .....	189																																																																																																							
250.36	High-Impedance Grounded Systems.....	150	310.3	Conductors .....	190	250.53	Grounding Electrode Installation Requirements.....	151	310.4	Conductor Construction and Applications .....	191	250.64	Grounding Electrode Conductor Installation .....	152	310.6	Conductor Identification.....	193	250.68	Grounding Electrode Conductor and Bonding Jumper Connection to Grounding Electrodes .....	156	310.10	Uses Permitted .....	193	250.98	Bonding Loosely Jointed Metal Raceways.....	157	310.12	Single-Phase Dwelling Services and Feeders .....	194	250.104	Bonding of Piping Systems and Exposed Structural Metal ....	158	310.14	Ampacities for Conductors Rated 0V Through 2,000V .....	198				310.15	Ampacity Tables .....	199				310.16	Ampacities of Insulated Conductors in Raceways, Cables, or Buried .....	207	<b>Article 312—Cabinets</b> .....				209	312.5	Enclosures .....	209	312.6	Deflection of Conductors.....	211	312.8	Overcurrent Device Enclosures .....	211																																												
310.3	Conductors .....	190																																																																																																							
250.53	Grounding Electrode Installation Requirements.....	151	310.4	Conductor Construction and Applications .....	191	250.64	Grounding Electrode Conductor Installation .....	152	310.6	Conductor Identification.....	193	250.68	Grounding Electrode Conductor and Bonding Jumper Connection to Grounding Electrodes .....	156	310.10	Uses Permitted .....	193	250.98	Bonding Loosely Jointed Metal Raceways.....	157	310.12	Single-Phase Dwelling Services and Feeders .....	194	250.104	Bonding of Piping Systems and Exposed Structural Metal ....	158	310.14	Ampacities for Conductors Rated 0V Through 2,000V .....	198				310.15	Ampacity Tables .....	199				310.16	Ampacities of Insulated Conductors in Raceways, Cables, or Buried .....	207	<b>Article 312—Cabinets</b> .....				209	312.5	Enclosures .....	209	312.6	Deflection of Conductors.....	211	312.8	Overcurrent Device Enclosures .....	211																																																		
310.4	Conductor Construction and Applications .....	191																																																																																																							
250.64	Grounding Electrode Conductor Installation .....	152	310.6	Conductor Identification.....	193	250.68	Grounding Electrode Conductor and Bonding Jumper Connection to Grounding Electrodes .....	156	310.10	Uses Permitted .....	193	250.98	Bonding Loosely Jointed Metal Raceways.....	157	310.12	Single-Phase Dwelling Services and Feeders .....	194	250.104	Bonding of Piping Systems and Exposed Structural Metal ....	158	310.14	Ampacities for Conductors Rated 0V Through 2,000V .....	198				310.15	Ampacity Tables .....	199				310.16	Ampacities of Insulated Conductors in Raceways, Cables, or Buried .....	207	<b>Article 312—Cabinets</b> .....				209	312.5	Enclosures .....	209	312.6	Deflection of Conductors.....	211	312.8	Overcurrent Device Enclosures .....	211

# Electrical Exam Preparation

## TABLE OF CONTENTS

<b>About This Textbook</b>	x	
<b>Passing Your Exam</b>	xiii	
<b>Additional Products to Help You Learn</b>	xvii	
<b>How to Use the <i>National Electrical Code</i></b>	1	
 <b>CHAPTER 1—ELECTRICAL FUNDAMENTALS</b> ..... 7		
<b>Unit 1—Basic Math, Advanced Math, and Electrical Circuits and Ohm's Law</b> ..... 9		
<b>Part A—Basic Math</b>	9	
Introduction	9	
1.1 Whole Numbers and Integers	9	
1.2 Fractional Numbers	9	
1.3 Decimal Numbers	9	
1.4 Percentages	10	
1.5 Multipliers	10	
1.6 Percentage Increase	12	
1.7 Reciprocals	13	
1.8 Parentheses	13	
1.9 Squaring a Number	14	
1.10 Square Root	14	
1.11 Kilo	15	
1.12 Rounding	16	
1.13 Testing Your Answer	16	
<b>Part A—Summary</b>	17	
<b>Part A—Conclusion</b>	17	
<b>Part B—Advanced Math</b>	18	
Introduction	18	
1.14 Units of Measurement	18	
1.15 Surface Area	18	
1.16 Volume	21	
1.17 Geometry and Trigonometry	21	
<b>Part B—Summary</b>	24	
<b>Part B—Conclusion</b>	24	
<b>Part C—Electrical Circuits and Ohm's Law</b>	24	
Introduction	24	
1.18 Electrical Circuit	24	
1.19 Electrical Power Source	25	
1.20 Circuit Resistance	25	
1.21 Ohm's Law	25	
1.22 Ohm's Law Formula Circle	26	
<b>Part C—Summary</b>	27	
<b>Part C—Conclusion</b>	28	
<b>Unit 1—Review Questions</b>	29	
<b>Unit 1—Challenge Questions</b>	32	
 <b>Unit 2—Electrical Circuits</b> ..... 35		
<b>Part A—Series Circuits</b> ..... 35		
Introduction	35	
2.1 Practical Uses of Series Circuits	35	
2.2 Understanding Series Circuits	37	
2.3 Series Circuit Notes	39	
2.4 Series-Connected Power Supplies	39	
<b>Part A—Summary</b>	39	
<b>Part A—Conclusion</b>	40	
<b>Part B—Parallel Circuits</b> ..... 40		
Introduction	40	
2.5 Practical Uses of Parallel Circuits	40	
2.6 Understanding Parallel Calculations	42	
2.7 Circuit Resistance	42	
2.8 Parallel Circuit Notes	46	
2.9 Parallel-Connected Power Supplies	46	
<b>Part B—Summary</b>	46	
<b>Part B—Conclusion</b>	47	
<b>Part C—Series-Parallel Circuits</b> ..... 47		
Introduction	47	
2.10 Review of Series and Parallel Circuits	47	
2.11 Working with Resistance in Series-Parallel Circuits	48	
2.12 Working with Voltage in Series-Parallel Circuits	50	
<b>Part C—Summary</b>	50	
<b>Part C—Conclusion</b>	51	
<b>Part D—Multiwire Circuits</b> ..... 51		
Introduction	51	
2.13 Neutral Wire	51	
2.14 Current Flow through the Neutral Wire	52	
2.15 Balanced Systems	53	
2.16 Multiwire Branch Circuits	53	
2.17 Dangers of Multiwire Circuits	55	

2.18 <i>NEC Requirements</i> .....	56	3.26 Using the Formula Wheel .....	82
Part D—Summary .....	57	3.27 Power Losses of Wires .....	82
Part D—Conclusion .....	57	3.28 Power Factor .....	84
Unit 2—Review Questions.....	58	3.29 Unity Power Factor.....	85
Unit 2—Challenge Questions.....	62	3.30 True Power (Watts) .....	85
 <b>Unit 3—Alternating Current</b> .....	 63	3.31 Power Factor Formulas .....	85
<b>Part A—Understanding Alternating Current</b> .....	63	3.32 Effects of Power Factor .....	86
Introduction.....	63	3.33 Efficiency.....	88
3.1 Current Flow .....	63	3.34 Efficiency Formulas.....	88
3.2 Use of Alternating Current and Direct Current.....	63	<b>Part D—Summary</b> .....	90
3.3 How Alternating Current is Produced .....	64	<b>Part D—Conclusion</b> .....	91
3.4 Alternating-Current Generator.....	64	Unit 3—Review Questions.....	92
3.5 Waveforms .....	64	Unit 3—Challenge Questions.....	98
3.6 Sine Wave—Sinusoidal Waveform .....	65	 <b>Unit 4—Motors and Transformers</b> .....	 101
3.7 Frequency .....	66	<b>Part A—Motor Basics</b> .....	101
3.8 Phase.....	66	Introduction.....	101
3.9 Phase Angle in Degrees .....	67	4.1 Motor Principles .....	101
3.10 Leading or Lagging Waveform.....	67	4.2 Dual-Voltage Alternating-Current Motors .....	102
3.11 Values in Alternating-Current Waveforms .....	68	4.3 Motor Horsepower Ratings .....	102
<b>Part A—Summary</b> .....	69	4.4 Motor Current Ratings .....	103
<b>Part A—Conclusion</b> .....	70	4.5 Calculating Motor FLA (Nameplate).....	104
 <b>Part B—Capacitance</b> .....	 70	4.6 Motor Starting Current .....	105
Introduction.....	70	4.7 Motor Running Current.....	106
3.12 How Capacitors Work .....	70	4.8 Motor Overload Protection .....	106
3.13 Determining Capacitance.....	72	<b>Part A—Summary</b> .....	107
3.14 Uses of Capacitors .....	73	<b>Part A—Conclusion</b> .....	107
<b>Part B—Summary</b> .....	74	 <b>Part B—Transformers</b> .....	 108
<b>Part B—Conclusion</b> .....	74	Introduction.....	108
 <b>Part C—Induction</b> .....	 75	4.9 Transformers .....	108
Introduction.....	75	4.10 Transformer Theory .....	108
3.15 How Induction Works.....	75	4.11 Primary vs. Secondary.....	108
3.16 Self-Induction.....	75	4.12 Transformer Induction .....	108
3.17 Conductor Alternating-Current Resistance .....	75	4.13 Induced Voltage, Secondary .....	109
3.18 Conductor Shape.....	77	4.14 Transformer Turns Ratio.....	109
3.19 Magnetic Cores .....	77	4.15 Autotransformers.....	112
3.20 Self-Induced (CEMF) and Applied Voltage .....	78	4.16 Power Losses .....	113
3.21 Phase Relationship .....	78	4.17 Efficiency.....	114
3.22 Uses of Induction.....	78	4.18 Transformer kVA Rating .....	114
<b>Part C—Summary</b> .....	79	4.19 Current Rating .....	115
<b>Part C—Conclusion</b> .....	79	<b>Part B—Summary</b> .....	116
 <b>Part D—Power, Power Factor, and Efficiency</b> .....	 80	<b>Part B—Conclusion</b> .....	117
Introduction.....	80	Unit 4—Review Questions.....	118
3.23 Power .....	80	Unit 4—Challenge Questions.....	122
3.24 PIE Power Formula Circle .....	80		
3.25 Formula Wheel .....	81		

<b>CHAPTER 2—NEC CALCULATIONS</b>	125
<b>Unit 5—Raceway and Box Calculations</b>	127
Part A—Raceway Sizing	127
Introduction	127
5.1 Conductor Dimensions—Chapter 9, Tables 5 and 8	128
5.2 Raceway Properties	131
5.3 Raceways with Different Size Conductors	133
5.4 Raceway Sizing Steps	134
5.5 Multiconductor and Optical Fiber Cables—Chapter 9, Note (5) and Note (9)	136
5.6 Cables with Elliptical Cross Sections—Chapter 9, Note (9)	138
5.7 Sizing Raceways Using Annex C	139
5.8 Conductor Jamming—Chapter 9, Table 1, Note 2	142
5.9 Sizing Wireways	143
5.10 Sizing Wireways for Conductor Bending Radius [376.23(A)]	146
5.11 Tips for Raceway Calculations	146
Part B—Outlet Box Fill	146
Introduction	146
5.12 Box Sizing—Conductors All the Same Size [314.16(A)]	147
5.13 Box Fill Calculations [314.16(B)]	149
5.14 Outlet Box Sizing Steps	153
5.15 Tips for Outlet Box Sizing	155
Part C—Pull Boxes, Junction Boxes, and Conduit Bodies	155
Introduction	155
5.16 Pull/Junction Box Sizing Requirements	155
5.17 Tips for Pull/Junction Box Sizing	157
5.18 Pull Box Examples	157
5.19 Tips for Pull Box Sizing	160
Unit 5—Conclusion	160
Unit 5—Review Questions	161
Unit 5—Challenge Questions	167
<b>Unit 6—Conductor Sizing and Protection Calculations</b>	169
Part A—Conductor Requirements	169
Introduction	169
6.1 Conductor Insulation [310.4]	169
6.2 Conductor Sizes	172
6.3 Minimum Conductor Size [310.3]	172
6.4 Conductor Size—Equipment Terminal Rating [110.14(C)]	172
6.5 Overcurrent Protection [240.4]	175
Part B—Conductor Ampacity	179
Introduction	179
6.6 Conductor Ampacity [310.14]	180
6.7 Ampacity Table [310.15]	180
6.8 Ambient Temperature Correction [310.15(B)]	181
6.9 Ampacity Adjustment [310.15(C)]	183
6.10 Combining Ambient Temperature Correction and Conductor Bundling Adjustment	185
6.11 Current-Carrying Conductors [310.15(E)]	186
6.12 Wireways—Conductor Ampacity Adjustment	188
6.13 Overcurrent Protection and Conductor Sizing	189
6.14 Feeder Tap Rules [240.21]	200
6.15 Transformer Secondary Conductors [240.21(C)]	204
Unit 6—Conclusion	206
Unit 6—Review Questions	207
Unit 6—Challenge Questions	213
<b>Unit 7—Motor, Air-Conditioning, and Transformer Calculations</b>	217
Part A—Motor Calculations	217
7.1 Scope of Article 430	217
7.2 Motor Full-Load Current (FLC)	218
7.3 Motor Full-Load Current and Motor Nameplate Current Rating [430.6(A)]	219
7.4 Branch-Circuit Conductor Sizing [430.22]	220
7.5 Feeder Conductor Sizing [430.24]	223
7.6 Overcurrent Protection	225
7.7 Overload Protection Sizing	226
7.8 Branch-Circuit Short-Circuit and Ground-Fault Protection	230
7.9 Branch-Circuit Summary	234
7.10 Combined Branch-Circuit Overcurrent Protection [430.55]	235
7.11 Feeder Short-Circuit and Ground-Fault Protection [430.62]	235
7.12 Motor Watts versus Motor Volt-Amperes (VA)	238
7.13 Adjustable-Speed Drives	241
7.14 Fire Pump Motor Circuits	242
Part B—Air-Conditioning Calculations	243
7.15 Scope of Article 440	243
7.16 Multimotor Air-Conditioning Equipment [440.4(B)]	244
Part C—Transformers	245
7.17 Transformer Overcurrent Protection [450.3(B)]	245
7.18 Primary Conductor Sizing	248
7.19 Secondary Conductor Sizing	249
7.20 Bonding and Grounding	252
Unit 7—Conclusion	256
Unit 7—Review Questions	257
Unit 7—Challenge Questions	264

<b>Unit 8—Voltage-Drop Calculations</b>	267	<b>Part C—Neutral Load Calculations</b>	317
<b>Part A—Conductor Resistance Calculations</b>	267	9.13 Service Neutral Calculations—Dryers and Ranges [220.61] .....	317
Introduction.....	267	9.14 Neutral Service and Feeder Calculation [220.61(B)] Example .....	317
8.1 Conductor Size .....	267	9.15 Number of General Lighting and General-Purpose Receptacle Circuits [210.11(A)] .....	318
8.2 Conductor Resistance .....	269		
8.3 Alternating-Current Conductor Resistance .....	272		
8.4 Alternating-Current Resistance [Chapter 9, Table 9] .....	272		
8.5 Alternating-Current Resistance versus Direct-Current Resistance .....	274		
<b>Part B—Voltage-Drop Considerations</b>	275		
Introduction.....	275		
8.6 Voltage-Drop—Manufacturer and <i>NEC</i> Recommendations.....	275		
8.7 Determining Circuit Conductors' Voltage Drop—Ohm's Law Method .....	278		
8.8 Sizing Conductors for Voltage-Drop Consideration .....	279		
8.9 Determining Circuit Conductors' Voltage Drop—Formula Method .....	283		
8.10 Limiting Conductor Length (Distance) to Minimize Voltage Drop .....	285		
8.11 Limiting Current to Limit Voltage Drop .....	288		
Unit 8—Conclusion .....	291		
Unit 8—Review Questions.....	292		
Unit 8—Challenge Questions.....	297		
<b>Unit 9—Dwelling Unit Calculations</b>	299		
Introduction.....	299		
<b>Part A—Optional Method Load Calculations [Article 220, Part IV]</b>	299		
Introduction.....	299	<b>Part C—Neutral Load Calculations</b>	358
9.1 Dwelling Unit Optional Load Calculations [220.82] .....	300	10.11 Dryers and Cooking Equipment [220.61] .....	358
9.2 Dwelling Unit Optional Load Calculation [220.82] Example .....	301	10.12 Service Neutral [220.61(B)].....	360
9.3 Existing Dwelling Unit Optional Load Calculations [220.83] .....	302		
9.4 Existing Dwelling Unit Optional Load Calculation [220.83] Example.....	303		
<b>Part B—Standard Method Load Calculations [Article 220, Part III]</b>	304		
9.5 Dwelling Unit Standard Load Calculation .....	304		
9.6 General Lighting and General-Use Receptacle Demand Load [220.42].....	304		
9.7 Fixed Appliance Demand Load [220.53] .....	306		
9.8 Dryer Demand Load [220.54].....	307		
9.9 Electric Cooking Equipment Demand Load [220.55].....	307		
9.10 Air-Conditioning, Heating, and Air Handlers [220.60] .....	311		
9.11 Feeder and Service Conductor Size [Table 310.12] .....	312		
9.12 Standard Method Load Calculations Example [Article 220, Part III].....	315		

## CHAPTER 3—ADVANCED *NEC* CALCULATIONS .....

### Unit 10—Multifamily Dwelling Calculations .....

#### Part A—Optional Method Load Calculations [Article 220, Part IV] .....

Introduction.....

10.1 Multifamily Dwelling Optional Load Calculations [220.84].....

10.2 Multifamily Dwelling Optional Method [220.84] Examples.....

#### Part B—Standard Method Load Calculations [Article 220, Part III] .....

Introduction.....

10.3 General Lighting and General-Use Receptacle Demand Load [220.42].....

10.4 Appliance Demand Load [220.53] .....

10.5 Dryer Demand Load [220.54].....

10.6 Electric Cooking Equipment Demand Load [220.55].....

10.7 Air-Conditioning versus Heating Demand Load [220.60] .....

10.8 Service Conductor Sizing [310.16] .....

10.9 Multifamily Dwelling Calculations—Standard Method Examples....

10.10 Two-Family Dwelling Units [220.85].....

#### Part C—Neutral Load Calculations .....

10.11 Dryers and Cooking Equipment [220.61] .....

10.12 Service Neutral [220.61(B)].....

Unit 10—Conclusion .....

Unit 10—Review Questions .....

Unit 10—Challenge Questions.....

## Unit 11—Commercial Calculations .....

### Part A—General .....

Introduction.....

11.1 General Lighting Demand Factors [Tables 220.12 and 220.42]....

11.2 General Lighting Load Examples.....

11.3 Sign Circuit [220.14(F) and 600.5(A)].....

11.4 Show-Window Lighting [220.14(G)].....

11.5 Multioutlet Receptacle Assemblies [220.14(H)] .....

11.6 Receptacle Load [220.14(I) and 220.44] .....

11.7 Offices—Receptacle Demand Load [220.14(K)] .....

11.8 Air-Conditioning versus Heating Demand Load [220.60] .....

<b>Part B—Examples</b> .....	383	<i>NEC Practice Quiz 13—Straight Order [430.1–525.23]</i> .....	475
11.9 Office Buildings .....	383	<i>NEC Practice Quiz 14—Random Order [90.1–525.23]</i> .....	480
11.10 Manufactured Home Parks [550.31] .....	385	<i>NEC Practice Quiz 15—Straight Order [547.1–680.25]</i> .....	485
11.11 Recreational Vehicle Parks [551.73] .....	385	<i>NEC Practice Quiz 16—Random Order [90.1–680.25]</i> .....	491
11.12 Marinas [555.6] .....	386	<i>NEC Practice Quiz 17—Straight Order [680.26–701.12]</i> .....	496
<b>Part C—Optional Method—New Restaurant Feeder/Service Load Calculations</b> .....	387	<i>NEC Practice Quiz 18—Random Order [90.1–701.12]</i> .....	501
Introduction .....	387	<i>NEC Practice Quiz 19—Straight Order [90.1–820.100]</i> .....	506
11.13 New Restaurant—Optional Method [220.88] .....	387	<i>NEC Practice Quiz 20—Random Order [90.1–820.100]</i> .....	512
<b>Part D—Welders</b> .....	390	<i>NEC Challenge Exam 1—Articles 90–820</i> .....	517
Introduction .....	390	<i>NEC Challenge Exam 2—Articles 90–820</i> .....	522
11.14 Arc Welders .....	390	<i>NEC Challenge Exam 3—Articles 90–820</i> .....	527
11.15 Resistance Welders .....	392	<i>NEC Challenge Exam 4—Articles 90–820</i> .....	532
<b>Part E—Light Industrial and School Calculations Examples</b> .....	394	<i>NEC Challenge Exam 5—Articles 90–820</i> .....	537
11.16 Light Industrial Calculations Examples .....	394	<i>NEC Challenge Exam 6—Articles 90–820</i> .....	543
11.17 School Optional Method Load Calculations [220.86] .....	396	<i>NEC Challenge Exam 7—Articles 90–820</i> .....	548
Unit 11—Conclusion .....	397	<i>NEC Challenge Exam 8—Articles 90–820</i> .....	553
Unit 11—Review Questions .....	398	<i>NEC Challenge Exam 9—Articles 90–820</i> .....	558
Unit 11—Challenge Questions .....	402	<i>NEC Challenge Exam 10—Articles 90–820</i> .....	563
<b>CHAPTER 4—NEC PRACTICE QUIZZES AND CHALLENGE EXAMS</b> .....	409	<i>NEC Challenge Exam 11—Articles 90–820</i> .....	568
<i>NEC Practice Quiz 1—Straight Order [90.1–110.16]</i> .....	411	<i>NEC Challenge Exam 12—Articles 90–820</i> .....	573
<i>NEC Practice Quiz 2—Random Order [90.1–110.16]</i> .....	416	<i>NEC Challenge Exam 13—Articles 90–820</i> .....	578
<i>NEC Practice Quiz 3—Straight Order [110.21–225.39]</i> .....	421	<i>NEC Challenge Exam 14—Articles 90–820</i> .....	583
<i>NEC Practice Quiz 4—Random Order [90.1–225.39]</i> .....	426	<i>NEC Challenge Exam 15—Articles 90–820</i> .....	588
<i>NEC Practice Quiz 5—Straight Order [230.1–250.64]</i> .....	432	<i>NEC Challenge Exam 16—Articles 90–820</i> .....	593
<i>NEC Practice Quiz 6—Random Order [90.1–250.64]</i> .....	437	<i>NEC Challenge Exam 17—Articles 90–820</i> .....	599
<i>NEC Practice Quiz 7—Straight Order [250.66–314.16]</i> .....	442	<i>NEC Challenge Exam 18—Articles 90–820</i> .....	604
<i>NEC Practice Quiz 8—Random Order [90.1–314.16]</i> .....	448	<i>NEC Challenge Exam 19—Articles 90–820</i> .....	610
<i>NEC Practice Quiz 9—Straight Order [314.17–362.30]</i> .....	454	<i>NEC Challenge Exam 20—Articles 90–820</i> .....	615
<i>NEC Practice Quiz 10—Random Order [90.1–362.30]</i> .....	459	<i>NEC Final Exam</i> .....	621
<i>NEC Practice Quiz 11—Straight Order [376.22–422.31]</i> .....	464		
<i>NEC Practice Quiz 12—Random Order [90.1–422.31]</i> .....	469
