Changes to the NEC.....	2
Electrical Exam Preparation	10
Master Electrician Practice Exam.....	15

Changes to the National Electrical Code®

TABLE OF CONTENTS

About This Textbook	xiii	200.10 Identification of Terminals.....	54
Additional Products to Help You Learn.....	xvi		
How to Use the <i>National Electrical Code</i>	1		
Global Changes in the 2020 <i>National Electrical Code</i>	9		
Article 90—Introduction to the <i>National Electrical Code</i>	11		
90.2 Scope of the <i>NEC</i>	11		
CHAPTER 1—GENERAL RULES	15		
Article 100—Definitions	17		
100 Definitions	17		
Part III. Definitions, Hazardous (Classified) Locations	21		
Article 110—Requirements for Electrical Installations	33		
110.3 Examination, Identification, Installation, Use, and Product Listing (Certification) of Equipment.....	33		
110.5 Conductor Material	34		
110.12 Mechanical Execution of Work	34		
110.14 Conductor Termination and Splicing.....	36		
110.21 Markings	37		
110.22 Identification of Disconnecting Means	38		
110.24 Available Fault Current	38		
110.26 Spaces About Electrical Equipment.....	39		
110.28 Enclosure Types	47		
CHAPTER 2—WIRING AND PROTECTION	49		
Article 200—Use and Identification of Grounded Conductors	51		
200.3 Connections to Grounded System.....	52		
200.6 Identification of Grounded Conductors.....	52		
200.9 Means of Identification.....	53		
Article 210—Branch Circuits	55		
210.5 Identification for Branch Circuits.....	55		
210.6 Branch-Circuit Voltage Limitations.....	57		
210.8 GFCI Protection.....	57		
210.11 Branch Circuits Required	67		
210.12 Arc-Fault Circuit-Interrupter Protection	69		
210.15 Reconditioned Equipment.....	70		
210.19 Conductor Sizing	70		
210.52 Dwelling Unit Receptacle Outlet Requirements.....	72		
210.63 Equipment Requiring Servicing	78		
210.65 Meeting Rooms	79		
210.70 Lighting Outlet Requirements.....	81		
Article 215—Feeders	85		
215.2 Conductor Sizing	85		
215.9 Ground-Fault Circuit-Interrupter Protection for Personnel.....	86		
Article 220—Branch-Circuit, Feeder, and Service Load Calculations	87		
220.11 Floor Area	87		
220.12 Lighting Load for Non-Dwelling Occupancies	88		
220.14 Other Loads—Occupancies	90		
220.16 Loads for Additions to Existing Installations	92		
220.42 General Lighting Demand Factors	93		
220.53 Appliance Load, Dwelling	94		
220.60 Noncoincident Loads	95		
220.87 Determining Existing Loads	96		
Article 225—Outside Branch Circuits and Feeders	99		
225.4 Conductor Covering	99		
225.10 Wiring on Buildings (or Other Structures)	99		
225.15 Supports over Buildings	100		
225.19 Clearances from Buildings	100		
225.30 Number of Supplies	102		
Article 230—Services	105		
230.31 Underground Service Conductor Size and Ampacity	105		
230.42 Minimum Size and Ampacity	106		

230.43	Wiring Methods	106	Part VI. Equipment Grounding and Equipment Grounding Conductors	162																																																																																																					
230.44	Cable Trays	107	250.109 Metal Enclosures.....	162																																																																																																					
230.46	Spliced Conductors.....	107	250.112 Specific Equipment Fastened in Place (Fixed) or Connected by Permanent Wiring Methods.....	162																																																																																																					
230.62	Service Equipment—Enclosed or Guarded	108	250.114 Equipment Connected by Cord and Plug.....	163																																																																																																					
230.66	Marking for Service Disconnect	109	250.119 Identification of Equipment Grounding Conductors	164																																																																																																					
230.67	Surge Protection	110	250.120 Equipment Grounding Conductor Installation.....	165																																																																																																					
230.70	Service Disconnect Requirements.....	111	250.121 Restricted Use of Equipment Grounding Conductors	166																																																																																																					
230.71	Number of Service Disconnects.....	111	250.122 Sizing Equipment Grounding Conductors.....	166																																																																																																					
230.82	Connected on Supply Side of the Service Disconnect.....	112	250.132 Short Sections of Raceway	170																																																																																																					
230.85	Emergency Disconnects.....	114	250.136 Equipment Secured to Grounded Metal Supports	171																																																																																																					
Article 240—Overcurrent Protection				117																																																																																																					
240.2	Definitions	118	250.138 Cord-and-Plug-Connected Equipment.....	171																																																																																																					
240.5	Protection of Flexible Cords, Flexible Cables, and Fixture Wires	118	250.146 Connecting Receptacle Grounding Terminal to an Equipment Grounding Conductor.....	172																																																																																																					
240.6	Standard Ampere Ratings.....	119	250.148 Continuity of Equipment Grounding Conductors in Boxes.....	175																																																																																																					
240.21	Location in Circuit	119																																																																																																							
240.24	Location of Overcurrent Protective Devices at Premises	123																																																																																																							
240.33	Vertical Position	125																																																																																																							
240.40	Disconnecting Means for Fuses	125																																																																																																							
240.62	Reconditioned Equipment.....	126																																																																																																							
240.67	Arc Energy Reduction—Fuses.....	126																																																																																																							
240.86	Series Ratings	127																																																																																																							
240.87	Arc Energy Reduction—Circuit Breakers	128																																																																																																							
240.88	Reconditioned Equipment.....	129																																																																																																							
240.91	Protection of Conductors	130																																																																																																							
Article 242—Overvoltage Protection				131																																																																																																					
242	Overvoltage Protection.....	132																																																																																																							
Article 250—Grounding and Bonding				137																																																																																																					
250.6	Objectionable Current.....	137	Article 300—General Requirements for Wiring Methods and Materials	179																																																																																																					
250.12	Clean Surfaces	137	300.3	Conductors	183	250.20	Systems Required to be Grounded	138	300.4	Protection Against Physical Damage	185	250.25	Grounding for Supply Side of the Service Disconnect	139	300.7	Raceways Exposed to Different Temperatures.....	186	250.26	Conductor to Be Grounded—Alternating-Current Systems	139	300.22	Wiring in Ducts and Plenum Spaces	186	250.28	Main Bonding Jumper and System Bonding Jumper.....	140	300.25	Exit Enclosures (Stair Towers).....	187	250.30	Separately Derived Systems	141	250.32	Buildings Supplied by a Feeder	148	Article 310—Conductors for General Wiring	189	250.34	Generators—Portable and Vehicle- or Trailer-Mounted	149	310.1	Scope	189	250.36	High-Impedance Grounded Systems.....	150	310.3	Conductors	190	250.53	Grounding Electrode Installation Requirements.....	151	310.4	Conductor Construction and Applications	191	250.64	Grounding Electrode Conductor Installation	152	310.6	Conductor Identification.....	193	250.68	Grounding Electrode Conductor and Bonding Jumper Connection to Grounding Electrodes	156	310.10	Uses Permitted	193	250.98	Bonding Loosely Jointed Metal Raceways.....	157	310.12	Single-Phase Dwelling Services and Feeders	194	250.104	Bonding of Piping Systems and Exposed Structural Metal	158	310.14	Ampacities for Conductors Rated 0V Through 2,000V	198				310.15	Ampacity Tables	199				310.16	Ampacities of Insulated Conductors in Raceways, Cables, or Buried	207	Article 312—Cabinets				209	312.5	Enclosures	209	312.6	Deflection of Conductors.....	211	312.8	Overcurrent Device Enclosures	211
300.3	Conductors	183																																																																																																							
250.20	Systems Required to be Grounded	138	300.4	Protection Against Physical Damage	185	250.25	Grounding for Supply Side of the Service Disconnect	139	300.7	Raceways Exposed to Different Temperatures.....	186	250.26	Conductor to Be Grounded—Alternating-Current Systems	139	300.22	Wiring in Ducts and Plenum Spaces	186	250.28	Main Bonding Jumper and System Bonding Jumper.....	140	300.25	Exit Enclosures (Stair Towers).....	187	250.30	Separately Derived Systems	141	250.32	Buildings Supplied by a Feeder	148	Article 310—Conductors for General Wiring	189	250.34	Generators—Portable and Vehicle- or Trailer-Mounted	149	310.1	Scope	189	250.36	High-Impedance Grounded Systems.....	150	310.3	Conductors	190	250.53	Grounding Electrode Installation Requirements.....	151	310.4	Conductor Construction and Applications	191	250.64	Grounding Electrode Conductor Installation	152	310.6	Conductor Identification.....	193	250.68	Grounding Electrode Conductor and Bonding Jumper Connection to Grounding Electrodes	156	310.10	Uses Permitted	193	250.98	Bonding Loosely Jointed Metal Raceways.....	157	310.12	Single-Phase Dwelling Services and Feeders	194	250.104	Bonding of Piping Systems and Exposed Structural Metal	158	310.14	Ampacities for Conductors Rated 0V Through 2,000V	198				310.15	Ampacity Tables	199				310.16	Ampacities of Insulated Conductors in Raceways, Cables, or Buried	207	Article 312—Cabinets				209	312.5	Enclosures	209	312.6	Deflection of Conductors.....	211	312.8	Overcurrent Device Enclosures	211						
300.4	Protection Against Physical Damage	185																																																																																																							
250.25	Grounding for Supply Side of the Service Disconnect	139	300.7	Raceways Exposed to Different Temperatures.....	186	250.26	Conductor to Be Grounded—Alternating-Current Systems	139	300.22	Wiring in Ducts and Plenum Spaces	186	250.28	Main Bonding Jumper and System Bonding Jumper.....	140	300.25	Exit Enclosures (Stair Towers).....	187	250.30	Separately Derived Systems	141	250.32	Buildings Supplied by a Feeder	148	Article 310—Conductors for General Wiring	189	250.34	Generators—Portable and Vehicle- or Trailer-Mounted	149	310.1	Scope	189	250.36	High-Impedance Grounded Systems.....	150	310.3	Conductors	190	250.53	Grounding Electrode Installation Requirements.....	151	310.4	Conductor Construction and Applications	191	250.64	Grounding Electrode Conductor Installation	152	310.6	Conductor Identification.....	193	250.68	Grounding Electrode Conductor and Bonding Jumper Connection to Grounding Electrodes	156	310.10	Uses Permitted	193	250.98	Bonding Loosely Jointed Metal Raceways.....	157	310.12	Single-Phase Dwelling Services and Feeders	194	250.104	Bonding of Piping Systems and Exposed Structural Metal	158	310.14	Ampacities for Conductors Rated 0V Through 2,000V	198				310.15	Ampacity Tables	199				310.16	Ampacities of Insulated Conductors in Raceways, Cables, or Buried	207	Article 312—Cabinets				209	312.5	Enclosures	209	312.6	Deflection of Conductors.....	211	312.8	Overcurrent Device Enclosures	211												
300.7	Raceways Exposed to Different Temperatures.....	186																																																																																																							
250.26	Conductor to Be Grounded—Alternating-Current Systems	139	300.22	Wiring in Ducts and Plenum Spaces	186	250.28	Main Bonding Jumper and System Bonding Jumper.....	140	300.25	Exit Enclosures (Stair Towers).....	187	250.30	Separately Derived Systems	141	250.32	Buildings Supplied by a Feeder	148	Article 310—Conductors for General Wiring	189	250.34	Generators—Portable and Vehicle- or Trailer-Mounted	149	310.1	Scope	189	250.36	High-Impedance Grounded Systems.....	150	310.3	Conductors	190	250.53	Grounding Electrode Installation Requirements.....	151	310.4	Conductor Construction and Applications	191	250.64	Grounding Electrode Conductor Installation	152	310.6	Conductor Identification.....	193	250.68	Grounding Electrode Conductor and Bonding Jumper Connection to Grounding Electrodes	156	310.10	Uses Permitted	193	250.98	Bonding Loosely Jointed Metal Raceways.....	157	310.12	Single-Phase Dwelling Services and Feeders	194	250.104	Bonding of Piping Systems and Exposed Structural Metal	158	310.14	Ampacities for Conductors Rated 0V Through 2,000V	198				310.15	Ampacity Tables	199				310.16	Ampacities of Insulated Conductors in Raceways, Cables, or Buried	207	Article 312—Cabinets				209	312.5	Enclosures	209	312.6	Deflection of Conductors.....	211	312.8	Overcurrent Device Enclosures	211																		
300.22	Wiring in Ducts and Plenum Spaces	186																																																																																																							
250.28	Main Bonding Jumper and System Bonding Jumper.....	140	300.25	Exit Enclosures (Stair Towers).....	187	250.30	Separately Derived Systems	141	250.32	Buildings Supplied by a Feeder	148	Article 310—Conductors for General Wiring	189	250.34	Generators—Portable and Vehicle- or Trailer-Mounted	149	310.1	Scope	189	250.36	High-Impedance Grounded Systems.....	150	310.3	Conductors	190	250.53	Grounding Electrode Installation Requirements.....	151	310.4	Conductor Construction and Applications	191	250.64	Grounding Electrode Conductor Installation	152	310.6	Conductor Identification.....	193	250.68	Grounding Electrode Conductor and Bonding Jumper Connection to Grounding Electrodes	156	310.10	Uses Permitted	193	250.98	Bonding Loosely Jointed Metal Raceways.....	157	310.12	Single-Phase Dwelling Services and Feeders	194	250.104	Bonding of Piping Systems and Exposed Structural Metal	158	310.14	Ampacities for Conductors Rated 0V Through 2,000V	198				310.15	Ampacity Tables	199				310.16	Ampacities of Insulated Conductors in Raceways, Cables, or Buried	207	Article 312—Cabinets				209	312.5	Enclosures	209	312.6	Deflection of Conductors.....	211	312.8	Overcurrent Device Enclosures	211																								
300.25	Exit Enclosures (Stair Towers).....	187																																																																																																							
250.30	Separately Derived Systems	141																																																																																																							
250.32	Buildings Supplied by a Feeder	148	Article 310—Conductors for General Wiring	189																																																																																																					
250.34	Generators—Portable and Vehicle- or Trailer-Mounted	149	310.1	Scope	189	250.36	High-Impedance Grounded Systems.....	150	310.3	Conductors	190	250.53	Grounding Electrode Installation Requirements.....	151	310.4	Conductor Construction and Applications	191	250.64	Grounding Electrode Conductor Installation	152	310.6	Conductor Identification.....	193	250.68	Grounding Electrode Conductor and Bonding Jumper Connection to Grounding Electrodes	156	310.10	Uses Permitted	193	250.98	Bonding Loosely Jointed Metal Raceways.....	157	310.12	Single-Phase Dwelling Services and Feeders	194	250.104	Bonding of Piping Systems and Exposed Structural Metal	158	310.14	Ampacities for Conductors Rated 0V Through 2,000V	198				310.15	Ampacity Tables	199				310.16	Ampacities of Insulated Conductors in Raceways, Cables, or Buried	207	Article 312—Cabinets				209	312.5	Enclosures	209	312.6	Deflection of Conductors.....	211	312.8	Overcurrent Device Enclosures	211																																						
310.1	Scope	189																																																																																																							
250.36	High-Impedance Grounded Systems.....	150	310.3	Conductors	190	250.53	Grounding Electrode Installation Requirements.....	151	310.4	Conductor Construction and Applications	191	250.64	Grounding Electrode Conductor Installation	152	310.6	Conductor Identification.....	193	250.68	Grounding Electrode Conductor and Bonding Jumper Connection to Grounding Electrodes	156	310.10	Uses Permitted	193	250.98	Bonding Loosely Jointed Metal Raceways.....	157	310.12	Single-Phase Dwelling Services and Feeders	194	250.104	Bonding of Piping Systems and Exposed Structural Metal	158	310.14	Ampacities for Conductors Rated 0V Through 2,000V	198				310.15	Ampacity Tables	199				310.16	Ampacities of Insulated Conductors in Raceways, Cables, or Buried	207	Article 312—Cabinets				209	312.5	Enclosures	209	312.6	Deflection of Conductors.....	211	312.8	Overcurrent Device Enclosures	211																																												
310.3	Conductors	190																																																																																																							
250.53	Grounding Electrode Installation Requirements.....	151	310.4	Conductor Construction and Applications	191	250.64	Grounding Electrode Conductor Installation	152	310.6	Conductor Identification.....	193	250.68	Grounding Electrode Conductor and Bonding Jumper Connection to Grounding Electrodes	156	310.10	Uses Permitted	193	250.98	Bonding Loosely Jointed Metal Raceways.....	157	310.12	Single-Phase Dwelling Services and Feeders	194	250.104	Bonding of Piping Systems and Exposed Structural Metal	158	310.14	Ampacities for Conductors Rated 0V Through 2,000V	198				310.15	Ampacity Tables	199				310.16	Ampacities of Insulated Conductors in Raceways, Cables, or Buried	207	Article 312—Cabinets				209	312.5	Enclosures	209	312.6	Deflection of Conductors.....	211	312.8	Overcurrent Device Enclosures	211																																																		
310.4	Conductor Construction and Applications	191																																																																																																							
250.64	Grounding Electrode Conductor Installation	152	310.6	Conductor Identification.....	193	250.68	Grounding Electrode Conductor and Bonding Jumper Connection to Grounding Electrodes	156	310.10	Uses Permitted	193	250.98	Bonding Loosely Jointed Metal Raceways.....	157	310.12	Single-Phase Dwelling Services and Feeders	194	250.104	Bonding of Piping Systems and Exposed Structural Metal	158	310.14	Ampacities for Conductors Rated 0V Through 2,000V	198				310.15	Ampacity Tables	199				310.16	Ampacities of Insulated Conductors in Raceways, Cables, or Buried	207	Article 312—Cabinets				209	312.5	Enclosures	209	312.6	Deflection of Conductors.....	211	312.8	Overcurrent Device Enclosures	211																																																								
310.6	Conductor Identification.....	193																																																																																																							
250.68	Grounding Electrode Conductor and Bonding Jumper Connection to Grounding Electrodes	156	310.10	Uses Permitted	193	250.98	Bonding Loosely Jointed Metal Raceways.....	157	310.12	Single-Phase Dwelling Services and Feeders	194	250.104	Bonding of Piping Systems and Exposed Structural Metal	158	310.14	Ampacities for Conductors Rated 0V Through 2,000V	198				310.15	Ampacity Tables	199				310.16	Ampacities of Insulated Conductors in Raceways, Cables, or Buried	207	Article 312—Cabinets				209	312.5	Enclosures	209	312.6	Deflection of Conductors.....	211	312.8	Overcurrent Device Enclosures	211																																																														
310.10	Uses Permitted	193																																																																																																							
250.98	Bonding Loosely Jointed Metal Raceways.....	157	310.12	Single-Phase Dwelling Services and Feeders	194	250.104	Bonding of Piping Systems and Exposed Structural Metal	158	310.14	Ampacities for Conductors Rated 0V Through 2,000V	198				310.15	Ampacity Tables	199				310.16	Ampacities of Insulated Conductors in Raceways, Cables, or Buried	207	Article 312—Cabinets				209	312.5	Enclosures	209	312.6	Deflection of Conductors.....	211	312.8	Overcurrent Device Enclosures	211																																																																				
310.12	Single-Phase Dwelling Services and Feeders	194																																																																																																							
250.104	Bonding of Piping Systems and Exposed Structural Metal	158	310.14	Ampacities for Conductors Rated 0V Through 2,000V	198				310.15	Ampacity Tables	199				310.16	Ampacities of Insulated Conductors in Raceways, Cables, or Buried	207	Article 312—Cabinets				209	312.5	Enclosures	209	312.6	Deflection of Conductors.....	211	312.8	Overcurrent Device Enclosures	211																																																																										
310.14	Ampacities for Conductors Rated 0V Through 2,000V	198																																																																																																							
			310.15	Ampacity Tables	199				310.16	Ampacities of Insulated Conductors in Raceways, Cables, or Buried	207	Article 312—Cabinets				209	312.5	Enclosures	209	312.6	Deflection of Conductors.....	211	312.8	Overcurrent Device Enclosures	211																																																																																
310.15	Ampacity Tables	199																																																																																																							
			310.16	Ampacities of Insulated Conductors in Raceways, Cables, or Buried	207	Article 312—Cabinets				209	312.5	Enclosures	209	312.6	Deflection of Conductors.....	211	312.8	Overcurrent Device Enclosures	211																																																																																						
310.16	Ampacities of Insulated Conductors in Raceways, Cables, or Buried	207																																																																																																							
Article 312—Cabinets				209																																																																																																					
312.5	Enclosures	209																																																																																																							
312.6	Deflection of Conductors.....	211																																																																																																							
312.8	Overcurrent Device Enclosures	211																																																																																																							

Article 314—Outlet, Device, Pull, Junction Boxes; Conduit Bodies; and Handhole Enclosures	213	Article 356—Liquidtight Flexible Nonmetallic Conduit (Type LFNC)	245
314.16 Number of Conductors	213	356.10 Uses Permitted	245
314.17 Conductors That Enter Boxes or Conduit Bodies	219		
314.27 Outlet Box Requirements	220		
314.29 Boxes, Conduit Bodies, and Handhole Enclosures to Be Accessible	222		
Article 320—Armored Cable (Type AC)	223	Article 380—Multioutlet Assemblies	249
320.23 In Accessible Attics or Roof Spaces	223	380.12 Uses Not Permitted	249
320.80 Conductor Ampacity	223		
Article 330—Metal-Clad Cable (Type MC)	225		
330.80 Conductor Ampacities	225		
Article 334—Nonmetallic-Sheathed Cable (Type NM)	227	Article 392—Cable Trays	251
334.30 Securing and Supporting	227	392.10 Uses Permitted	251
Article 336—Power and Control Tray Cable (Type TC)	229	392.18 Cable Tray Installations	252
336.2 Definition	229	392.30 Securing and Supporting	252
336.10 Uses Permitted	229	392.44 Expansion Splice Plates	252
Article 338—Service-Entrance Cable (Types SE and USE)	231	392.46 Bushed Conduit and Tubing	253
338.2 Definitions	231		
338.10 Uses Permitted	232		
Article 340—Underground Feeder and Branch-Circuit Cable (Type UF)	235	CHAPTER 4—EQUIPMENT FOR GENERAL USE	255
340.10 Uses Permitted	235	Article 400—Flexible Cords and Flexible Cables	257
340.12 Uses Not permitted	236	400.12 Uses Not Permitted	257
Article 342—Intermediate Metal Conduit (Type IMC)	237	400.17 Protection from Damage	259
342.10 Uses Permitted	237		
342.14 Dissimilar Metals	237		
Article 344—Rigid Metal Conduit (Type RMC)	239	Article 402—Fixture Wires	261
344.10 Uses Permitted	239	402.3 (Fixture Wire) Types	261
344.14 Dissimilar Metals	239		
Article 350—Liquidtight Flexible Metal Conduit (Type LFMC)	241	Article 404—Switches	263
350.10 Uses Permitted	241	404.2 Switch Connections	263
350.12 Uses Not Permitted	242	404.4 Damp or Wet Locations	265
350.30 Securing and Supporting	242	404.7 Indicating	266
		404.9 General-Use Snap Switches, Dimmers, and Control Switches	267

How to Use the <i>National Electrical Code</i>	1	
CHAPTER 1—ELECTRICAL FUNDAMENTALS	7	
Unit 1—Basic Math, Advanced Math, and Electrical Circuits and Ohm's Law		
Part A—Basic Math	9	
Introduction	9	
1.1 Whole Numbers and Integers	9	
1.2 Fractional Numbers	9	
1.3 Decimal Numbers	9	
1.4 Percentages	10	
1.5 Multipliers	10	
1.6 Percentage Increase	12	
1.7 Reciprocals	13	
1.8 Parentheses	13	
1.9 Squaring a Number	14	
1.10 Square Root	14	
1.11 Kilo	15	
1.12 Rounding	16	
1.13 Testing Your Answer	16	
Part A—Summary	17	
Part A—Conclusion	17	
Part B—Advanced Math	18	
Introduction	18	
1.14 Units of Measurement	18	
1.15 Surface Area	18	
1.16 Volume	21	
1.17 Geometry and Trigonometry	21	
Part B—Summary	24	
Part B—Conclusion	24	
Part C—Electrical Circuits and Ohm's Law	24	
Introduction	24	
1.18 Electrical Circuit	24	
1.19 Electrical Power Source	25	
1.20 Circuit Resistance	25	
Part C—Summary	25	
Part C—Conclusion	25	
Part D—Multiwire Circuits	51	
Introduction	51	
2.13 Neutral Wire	51	
2.14 Current Flow through the Neutral Wire	52	
2.15 Balanced Systems	53	
2.16 Multiwire Branch Circuits	53	
2.17 Dangers of Multiwire Circuits	55	

2.18 <i>NEC Requirements</i>	56	3.26 Using the Formula Wheel	82
Part D—Summary	57	3.27 Power Losses of Wires	82
Part D—Conclusion	57	3.28 Power Factor	84
Unit 2—Review Questions.....	58	3.29 Unity Power Factor.....	85
Unit 2—Challenge Questions.....	62	3.30 True Power (Watts)	85
 Unit 3—Alternating Current	 63	3.31 Power Factor Formulas	85
Part A—Understanding Alternating Current	63	3.32 Effects of Power Factor	86
Introduction.....	63	3.33 Efficiency.....	88
3.1 Current Flow	63	3.34 Efficiency Formulas.....	88
3.2 Use of Alternating Current and Direct Current.....	63	Part D—Summary	90
3.3 How Alternating Current is Produced	64	Part D—Conclusion	91
3.4 Alternating-Current Generator.....	64	Unit 3—Review Questions.....	92
3.5 Waveforms	64	Unit 3—Challenge Questions.....	98
3.6 Sine Wave—Sinusoidal Waveform	65	 Unit 4—Motors and Transformers	 101
3.7 Frequency	66	Part A—Motor Basics	101
3.8 Phase.....	66	Introduction.....	101
3.9 Phase Angle in Degrees	67	4.1 Motor Principles	101
3.10 Leading or Lagging Waveform.....	67	4.2 Dual-Voltage Alternating-Current Motors	102
3.11 Values in Alternating-Current Waveforms	68	4.3 Motor Horsepower Ratings	102
Part A—Summary	69	4.4 Motor Current Ratings	103
Part A—Conclusion	70	4.5 Calculating Motor FLA (Nameplate).....	104
 Part B—Capacitance	 70	4.6 Motor Starting Current	105
Introduction.....	70	4.7 Motor Running Current.....	106
3.12 How Capacitors Work	70	4.8 Motor Overload Protection	106
3.13 Determining Capacitance.....	72	Part A—Summary	107
3.14 Uses of Capacitors	73	Part A—Conclusion	107
Part B—Summary	74	 Part B—Transformers	 108
Part B—Conclusion	74	Introduction.....	108
 Part C—Induction	 75	4.9 Transformers	108
Introduction.....	75	4.10 Transformer Theory	108
3.15 How Induction Works.....	75	4.11 Primary vs. Secondary.....	108
3.16 Self-Induction.....	75	4.12 Transformer Induction	108
3.17 Conductor Alternating-Current Resistance	75	4.13 Induced Voltage, Secondary	109
3.18 Conductor Shape.....	77	4.14 Transformer Turns Ratio.....	109
3.19 Magnetic Cores	77	4.15 Autotransformers.....	112
3.20 Self-Induced (CEMF) and Applied Voltage	78	4.16 Power Losses	113
3.21 Phase Relationship	78	4.17 Efficiency.....	114
3.22 Uses of Induction.....	78	4.18 Transformer kVA Rating	114
Part C—Summary	79	4.19 Current Rating	115
Part C—Conclusion	79	Part B—Summary	116
 Part D—Power, Power Factor, and Efficiency	 80	Part B—Conclusion	117
Introduction.....	80	Unit 4—Review Questions.....	118
3.23 Power	80	Unit 4—Challenge Questions.....	122
3.24 PIE Power Formula Circle	80		
3.25 Formula Wheel	81		

CHAPTER 2—NEC CALCULATIONS	125
Unit 5—Raceway and Box Calculations	127
Part A—Raceway Sizing	127
Introduction	127
5.1 Conductor Dimensions—Chapter 9, Tables 5 and 8	128
5.2 Raceway Properties	131
5.3 Raceways with Different Size Conductors	133
5.4 Raceway Sizing Steps	134
5.5 Multiconductor and Optical Fiber Cables—Chapter 9, Note (5) and Note (9)	136
5.6 Cables with Elliptical Cross Sections—Chapter 9, Note (9)	138
5.7 Sizing Raceways Using Annex C	139
5.8 Conductor Jamming—Chapter 9, Table 1, Note 2	142
5.9 Sizing Wireways	143
5.10 Sizing Wireways for Conductor Bending Radius [376.23(A)]	146
5.11 Tips for Raceway Calculations	146
Part B—Outlet Box Fill	146
Introduction	146
5.12 Box Sizing—Conductors All the Same Size [314.16(A)]	147
5.13 Box Fill Calculations [314.16(B)]	149
5.14 Outlet Box Sizing Steps	153
5.15 Tips for Outlet Box Sizing	155
Part C—Pull Boxes, Junction Boxes, and Conduit Bodies	155
Introduction	155
5.16 Pull/Junction Box Sizing Requirements	155
5.17 Tips for Pull/Junction Box Sizing	157
5.18 Pull Box Examples	157
5.19 Tips for Pull Box Sizing	160
Unit 5—Conclusion	160
Unit 5—Review Questions	161
Unit 5—Challenge Questions	167
Unit 6—Conductor Sizing and Protection Calculations	169
Part A—Conductor Requirements	169
Introduction	169
6.1 Conductor Insulation [310.4]	169
6.2 Conductor Sizes	172
6.3 Minimum Conductor Size [310.3]	172
6.4 Conductor Size—Equipment Terminal Rating [110.14(C)]	172
6.5 Overcurrent Protection [240.4]	175
Part B—Conductor Ampacity	179
Introduction	179
6.6 Conductor Ampacity [310.14]	180
6.7 Ampacity Table [310.15]	180
6.8 Ambient Temperature Correction [310.15(B)]	181
6.9 Ampacity Adjustment [310.15(C)]	183
6.10 Combining Ambient Temperature Correction and Conductor Bundling Adjustment	185
6.11 Current-Carrying Conductors [310.15(E)]	186
6.12 Wireways—Conductor Ampacity Adjustment	188
6.13 Overcurrent Protection and Conductor Sizing	189
6.14 Feeder Tap Rules [240.21]	200
6.15 Transformer Secondary Conductors [240.21(C)]	204
Unit 6—Conclusion	206
Unit 6—Review Questions	207
Unit 6—Challenge Questions	213
Unit 7—Motor, Air-Conditioning, and Transformer Calculations	217
Part A—Motor Calculations	217
7.1 Scope of Article 430	217
7.2 Motor Full-Load Current (FLC)	218
7.3 Motor Full-Load Current and Motor Nameplate Current Rating [430.6(A)]	219
7.4 Branch-Circuit Conductor Sizing [430.22]	220
7.5 Feeder Conductor Sizing [430.24]	223
7.6 Overcurrent Protection	225
7.7 Overload Protection Sizing	226
7.8 Branch-Circuit Short-Circuit and Ground-Fault Protection	230
7.9 Branch-Circuit Summary	234
7.10 Combined Branch-Circuit Overcurrent Protection [430.55]	235
7.11 Feeder Short-Circuit and Ground-Fault Protection [430.62]	235
7.12 Motor Watts versus Motor Volt-Amperes (VA)	238
7.13 Adjustable-Speed Drives	241
7.14 Fire Pump Motor Circuits	242
Part B—Air-Conditioning Calculations	243
7.15 Scope of Article 440	243
7.16 Multimotor Air-Conditioning Equipment [440.4(B)]	244
Part C—Transformers	245
7.17 Transformer Overcurrent Protection [450.3(B)]	245
7.18 Primary Conductor Sizing	248
7.19 Secondary Conductor Sizing	249
7.20 Bonding and Grounding	252
Unit 7—Conclusion	256
Unit 7—Review Questions	257
Unit 7—Challenge Questions	264

Unit 8—Voltage-Drop Calculations	267	Part C—Neutral Load Calculations	317
Part A—Conductor Resistance Calculations	267	9.13 Service Neutral Calculations—Dryers and Ranges [220.61]	317
Introduction.....	267	9.14 Neutral Service and Feeder Calculation [220.61(B)] Example	317
8.1 Conductor Size	267	9.15 Number of General Lighting and General-Purpose Receptacle Circuits [210.11(A)]	318
8.2 Conductor Resistance	269		
8.3 Alternating-Current Conductor Resistance	272		
8.4 Alternating-Current Resistance [Chapter 9, Table 9]	272		
8.5 Alternating-Current Resistance versus Direct-Current Resistance	274		
Part B—Voltage-Drop Considerations	275		
Introduction.....	275		
8.6 Voltage-Drop—Manufacturer and <i>NEC</i> Recommendations.....	275		
8.7 Determining Circuit Conductors' Voltage Drop—Ohm's Law Method	278		
8.8 Sizing Conductors for Voltage-Drop Consideration	279		
8.9 Determining Circuit Conductors' Voltage Drop—Formula Method	283		
8.10 Limiting Conductor Length (Distance) to Minimize Voltage Drop	285		
8.11 Limiting Current to Limit Voltage Drop	288		
Unit 8—Conclusion	291		
Unit 8—Review Questions.....	292		
Unit 8—Challenge Questions.....	297		
Unit 9—Dwelling Unit Calculations	299		
Introduction.....	299		
Part A—Optional Method Load Calculations [Article 220, Part IV]	299		
Introduction.....	299	Part C—Neutral Load Calculations	358
9.1 Dwelling Unit Optional Load Calculations [220.82]	300	10.11 Dryers and Cooking Equipment [220.61]	358
9.2 Dwelling Unit Optional Load Calculation [220.82] Example	301	10.12 Service Neutral [220.61(B)].....	360
9.3 Existing Dwelling Unit Optional Load Calculations [220.83]	302		
9.4 Existing Dwelling Unit Optional Load Calculation [220.83] Example.....	303		
Part B—Standard Method Load Calculations [Article 220, Part III]	304		
9.5 Dwelling Unit Standard Load Calculation	304		
9.6 General Lighting and General-Use Receptacle Demand Load [220.42].....	304		
9.7 Fixed Appliance Demand Load [220.53]	306		
9.8 Dryer Demand Load [220.54].....	307		
9.9 Electric Cooking Equipment Demand Load [220.55].....	307		
9.10 Air-Conditioning, Heating, and Air Handlers [220.60]	311		
9.11 Feeder and Service Conductor Size [Table 310.12]	312		
9.12 Standard Method Load Calculations Example [Article 220, Part III].....	315		

CHAPTER 3—ADVANCED NEC CALCULATIONS

Unit 10—Multifamily Dwelling Calculations

Part A—Optional Method Load Calculations [Article 220, Part IV]

Introduction.....

10.1 Multifamily Dwelling Optional Load Calculations [220.84].....

10.2 Multifamily Dwelling Optional Method [220.84] Examples.....

Part B—Standard Method Load Calculations [Article 220, Part III]

Introduction.....

10.3 General Lighting and General-Use Receptacle Demand Load [220.42].....

10.4 Appliance Demand Load [220.53]

10.5 Dryer Demand Load [220.54].....

10.6 Electric Cooking Equipment Demand Load [220.55].....

10.7 Air-Conditioning versus Heating Demand Load [220.60]

10.8 Service Conductor Sizing [310.16]

10.9 Multifamily Dwelling Calculations—Standard Method Examples.....

10.10 Two-Family Dwelling Units [220.85].....

Part C—Neutral Load Calculations

10.11 Dryers and Cooking Equipment [220.61]

10.12 Service Neutral [220.61(B)].....

Unit 10—Conclusion

Unit 10—Review Questions

Unit 10—Challenge Questions.....

Unit 11—Commercial Calculations

Part A—General

Introduction.....

11.1 General Lighting Demand Factors [Tables 220.12 and 220.42]....

11.2 General Lighting Load Examples.....

11.3 Sign Circuit [220.14(F) and 600.5(A)].....

11.4 Show-Window Lighting [220.14(G)].....

11.5 Multioutlet Receptacle Assemblies [220.14(H)]

11.6 Receptacle Load [220.14(I) and 220.44]

11.7 Offices—Receptacle Demand Load [220.14(K)]

11.8 Air-Conditioning versus Heating Demand Load [220.60]

Part B—Examples	383	<i>NEC Practice Quiz 13—Straight Order [430.1–525.23]</i>	475
11.9 Office Buildings	383	<i>NEC Practice Quiz 14—Random Order [90.1–525.23]</i>	480
11.10 Manufactured Home Parks [550.31]	385	<i>NEC Practice Quiz 15—Straight Order [547.1–680.25]</i>	485
11.11 Recreational Vehicle Parks [551.73]	385	<i>NEC Practice Quiz 16—Random Order [90.1–680.25]</i>	491
11.12 Marinas [555.6]	386	<i>NEC Practice Quiz 17—Straight Order [680.26–701.12]</i>	496
Part C—Optional Method—New Restaurant Feeder/Service Load Calculations	387	<i>NEC Practice Quiz 18—Random Order [90.1–701.12]</i>	501
Introduction	387	<i>NEC Practice Quiz 19—Straight Order [90.1–820.100]</i>	506
11.13 New Restaurant—Optional Method [220.88]	387	<i>NEC Practice Quiz 20—Random Order [90.1–820.100]</i>	512
Part D—Welders	390	<i>NEC Challenge Exam 1—Articles 90–820</i>	517
Introduction	390	<i>NEC Challenge Exam 2—Articles 90–820</i>	522
11.14 Arc Welders	390	<i>NEC Challenge Exam 3—Articles 90–820</i>	527
